Mac -N - Cheese

5

Kids Pasta

Choice of Alfredo or Butter Noodles

6

Grilled Cheese

Comes with Fries

5

Kid's Bluegill

Comes with Fries

8

Drinks

Kiddie Cocktail

Comes with toy

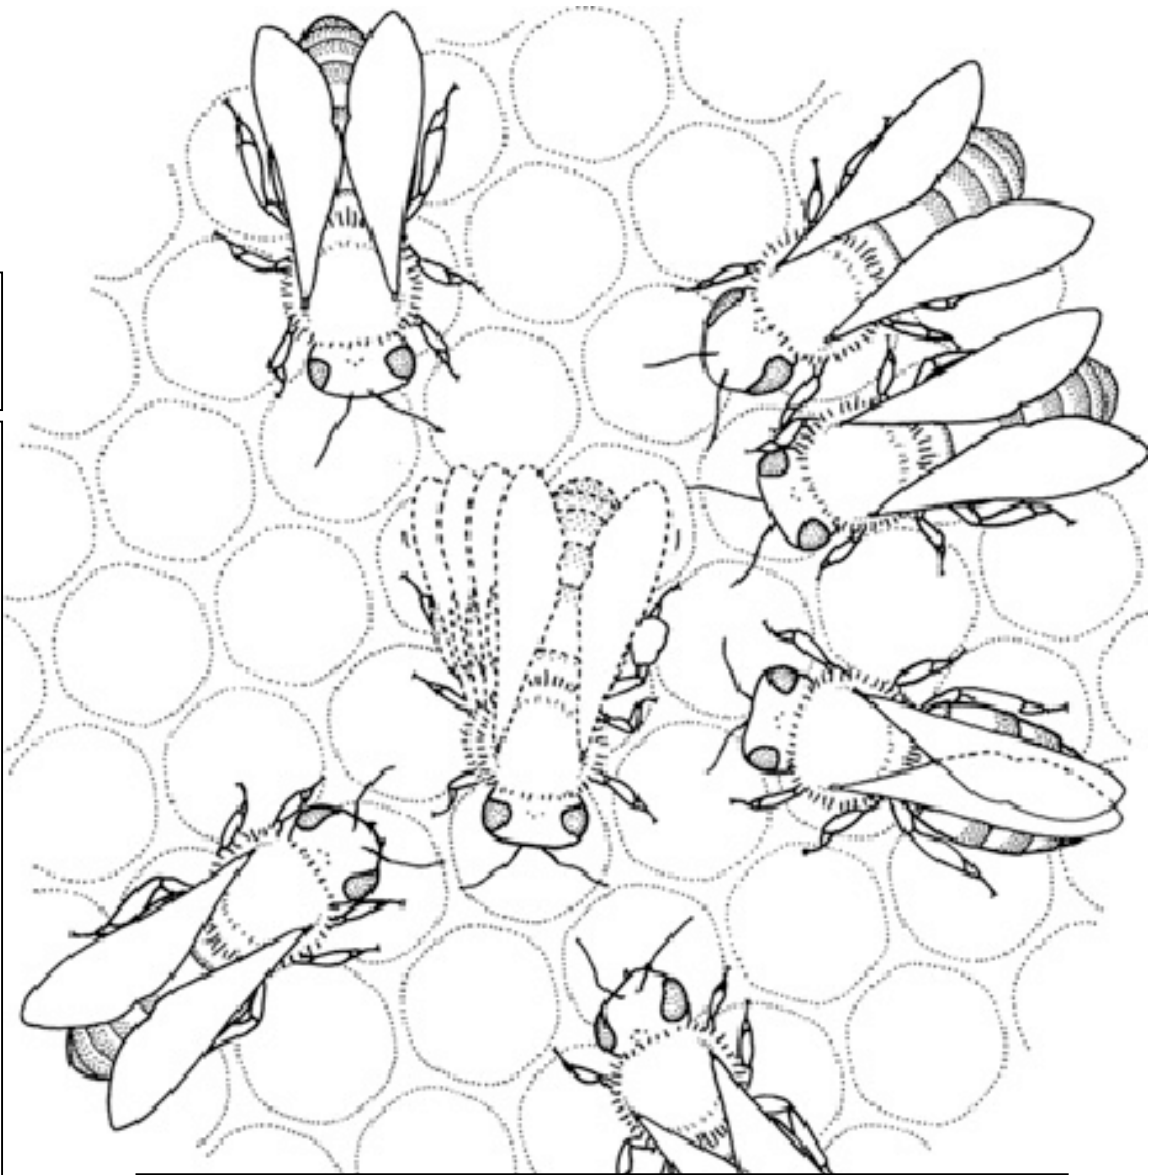

2

White or Chocolate Milk

Apple Juice

Dessert

Cookie

Waggle Dance

A honey bee pollen forager performing a waggle dance to dance follower bees. The waggle run communicates the direction and distance of the flower patch being used by the forager. The maneuver also provides other types of information such as the food odor which helps foragers to locate food sources. Dancing incorporates information filtering: honeybees dance only for high-quality resources and the better the food source, the more waggle runs they perform (longer dances). The number of recruits to a particular food source is proportional to the number of waggle runs. Honey bees use the waggle dance to communicate the location of nectar, pollen, water and resin (propolis), and also nest sites during swarming.
