

The Attleboro Land Trust
presents a series of
Guided Walks
at our nature preserves in Attleboro

Jul 13

The History of Barrows Farm

The Deborah and Roger Richardson Nature Preserve was once known as the Barrows Farm. This walk will be a journey back to colonial times, when the Barrows family lived off the land through farming and the manufacture of wood products. Leading the walk will be Bill Lewis, who will point out evidence of the various activities which once took place on the land.

Location: Richardson Nature Preserve, 577B Wilmarth Street

Time: 9:00 - 10:30 am, Saturday, July 13

Rain date: same time, Saturday, July 20

Aug 10

Getting to Know Your Watershed

Chances are that a drop of rain falling in Attleboro will eventually find its way to the Ten Mile River, which runs through the center of the city, then flows into the Seekonk River, which eventually flows into Narragansett Bay. Ben Cote, of Friends of the Ten Mile, will host this introduction to the river. He will explain the importance of the river and its watershed to past, present, and future generations, as well as to the plants and animals that thrive in its habitat.

Location: Larson Woodland, Watson Ave. and Riverbank Road (across from Willett School)

Time: 9:00 - 10:30 am, Saturday, August 10

Rain date: same time, Sunday, August 11

Beholding the Beauty of Trees

We sometimes take trees for granted, but they are part of the intricate web of life upon which we depend for our survival. Trees, in their infinite diversity and beauty also have the power to inspire. Join horticulturalist Phil Boucher on a walk through the Richardson Preserve, as he points out tree species that are native to the area, some invasive alien species, and some unique non-invasive species planted years ago by former resident Deborah Richardson.

Location: Richardson Nature Preserve, 577B Wilmarth Street

Time: 9:00 - 10:30 am, Saturday, September 14

Rain date: 1:00 pm, Sunday, September 15
