Our Practice

Princeton Spine and Joint Center offers a comprehensive range of cutting edge diagnostic and therapeutic services for spine and musculoskeletal disorders. Our goal is to eliminate your pain, maximize your function and performance, and improve your quality of life.

We use the most technologically advanced methods combined with a comprehensive examination to diagnose and treat your condition. Treatment and diagnostic options include but are not limited to:

- Fluoroscopic guided procedures
- Ultrasound guided procedures
- Interventional Spine Program
- Sports Medicine Program
- Regenerative Medicine Program
- Advanced electrodagnostic testing (EMG/NCV)
- Osteopathic manipulations
- Detailed Physical Therapy Prescriptions
- Multi-specialty care coordination
- Epidural steroid injections
- Facet joint injections
- Sacroiliac joint injections
- Platelet-Rich Plasma (PRP) injections
- Radiofrequency ablation
- Nerve blocks
- Peripheral joint injections

At the Princeton Spine and Joint Center, our doctors not only stay up-to-date with the latest musculoskeletal medicine research, we create, publish, edit, and review it. Our doctors not only read textbooks, we write them. Our guiding philosophy is simple: treat each patient as an individual, with professionalism, excellence, and respect. We are committed to providing the highest-quality, evidence-based medical care for spine and musculoskeletal disorders.

With good health, all things are possible.

Our Doctors

Ana Braciclovic, MD

A board certified physician specializing in the non-operative care of spine, joint, muscle and nerve pain. Dr. Braciclovic is the Co-Director of Princeton Spine and Joint Center and the Director of Princeton Dance Medicine. She completed a dual degree program with honors from the University of Pennsylvania in biomedical engineering and neural systems. After medical school at UMDNJ-Robert Wood Johnson, she completed her specialty training in Physical Medicine and Rehabilitation at New York-Presbyterian Hospital, The University Hospital of Columbia and Cornell. Dr. Braciclovic has published multiple peer reviewed papers and received numerous awards for her research in musculoskeletal medicine, including the prestigious Fleur Adler Award at Hospital for Special Surgery. Dr. Braciclovic serves as a reviewer for journals and is the author of the seminal medical text Essential Dance Medicine.

Grant Cooper, MD

A board certified, fellowship trained physician specializing in the non-operative care of spine, joint, muscle and nerve pain. Dr. Cooper is the Co-Director and Co-Director of Princeton Spine and Joint Center and the Co-Director of the Interventional Spine Program. After graduating with highest honors from Princeton University, Dr. Cooper received his medical degree from UMDNJ-Robert Wood Johnson and his specialty training from New York-Presbyterian Hospital, The University Hospital of Columbia and Cornell, followed by fellowship training in interventional spine and joint medicine at the prestigious Beth Israel Spine Institute in Manhattan. Dr. Cooper has authored and edited fifteen medical texts and has received national and international recognition for his peer-reviewed research. His expert opinion has been sought from a wide range of media including NBC Good Morning America, Health Show, ESPN, NPR, Vogue Magazine, Sirius XM Doctor Radio, the Ladies Home Journal, and the Wall Street Journal.

Zinoxy Meyer, DO

A board certified, fellowship trained physician specializing in the non-operative care of spine, joint, muscle and nerve pain. Dr. Meyer is the Co-Director of the Interventional Spine Program at Princeton Spine and Joint Center. After graduating from New York University and receiving his medical degree from the New York College of Osteopathic Medicine, Dr. Meyer performed his specialty training in Physical Medicine and Rehabilitation at New York-Presbyterian Hospital, The University Hospital of Columbia and Cornell, where he was honored to serve as Chief Resident. Following residency, Dr. Meyer received additional training in ultrasound guidance at the Mayo Clinic and completed his fellowship training in Interventional Spine and Joint Medicine at the prestigious Beth Israel Spine Institute in Manhattan. Dr. Meyer is the author of multiple medical chapters and peer-reviewed papers. He serves as a reviewer for medical journals and lectures widely. Dr. Meyer’s expert medical opinion has been sought in newspapers and on radio shows.

Marco Funiciello, DO

A board certified physician specializing in the non-operative care of spine, joint, muscle and nerve pain. Dr. Funiciello is the Co-Director of the Interventional Spine Program at Princeton Spine and Joint Center. After graduating from the University of Connecticut, Dr. Funiciello received his medical degree from UMDNJ-School of Osteopathic Medicine. Dr. Funiciello then received his specialty training in Physical Medicine and Rehabilitation from Saint Vincent’s Hospital in Manhattan where he was honored to serve as Chief Resident. Dr. Funiciello has extensive additional training in Osteopathic Manipulative Medicine and often utilizes this skill set to complement his conservative and holistic approach to his patients. Dr. Funiciello has authored numerous chapters and papers and lectures widely. He is consistently rated in one of the best doctors in the country by his peers and by his patients.

Scott Curtis, DO

A board certified, fellowship trained physician who specializes in the care of sports related injuries and general musculoskeletal care. Dr. Curtis is the Director of Sports Medicine at Princeton Spine and Joint Center. After attending Penn State University, Dr. Curtis received his medical degree from Lake Erie College of Osteopathic Medicine and then completed his residency at Maimonides Medical Center in Brooklyn, NY where he was honored to serve as Chief Resident. Dr. Curtis completed the renowned Sports Medicine Fellowship at Atlantis Sports Health where he worked with the New York Jets, St. John’s University Athletics, College of St. Elizabeth, and various high school teams. From weekend warriors to professional athletes, high school athletes to 90 + year old tennis players, Dr. Curtis has a singular focus to treat each patient as an individual, identify their concerns as well as their specific goals and help them reach their aspirations using the most effective non-surgical care options.

Zachary Perelman, DO

A board certified, fellowship trained physician specializing in the non-operative care of sports related injuries and musculoskeletal medicine with a particular emphasis in regenerative medicine. He currently serves as the Co-Director of Regenerative Medicine at Princeton Spine and Joint Center. Dr. Perelman earned his undergraduate degree in Molecular Biology and Biochemistry at Rutgers University and completed medical school in South Florida at Nova Southeastern University. He then completed his residency at UMDNJ-Robert Wood Johnson University Hospital. Dr. Perelman completed a sports medicine fellowship in San Antonio, Texas, where he worked with multiple professional sports teams, including the San Antonio Spurs, as well as multiple universities and high school teams.

Jason Kirkbride, MD, CAQSM

A board certified, fellowship trained sports medicine physician specializing in general musculoskeletal and sports related injuries. Dr. Kirkbride currently serves as the Co-Director of Regenerative Medicine at Princeton Spine and Joint Center. After attending Virginia Tech, Dr. Kirkbride received a Masters degree from Georgetown University. He attended Eastern Virginia Medical School, and then completed a residency in Physical Medicine and Rehabilitation at the University of Virginia, where he served with distinction as chief resident. Dr. Kirkbride also completed additional fellowship specialty training in Primary Care Sports Medicine at the University of Virginia, which afforded him the opportunity to work with the Virginia Cavalier student athletes, and local high schools.

Ziva Petrin, MD

A board certified fellowship trained physician who specializes in the non-surgical care of musculoskeletal injuries, sports medicine and physical medicine and rehabilitation. Dr. Petrin serves as an attending physician at Princeton Spine and Joint Center and the assistant director of the Dance Medicine Program and the Sports Medicine Program. Dr. Petrin completed her specialty training in physical medicine and rehabilitation at Thomas Jefferson University in Philadelphia before completing a fellowship in sports medicine at the University of Utah in Salt Lake City. Dr. Petrin has worked with Olympians, professional, collegiate and amateur athletes as well as weekend warriors and couch potatoes of all ages. Dr. Petrin brings a consummate wealth of experience and skills to her medical practice to provide optimal non-surgical care to her patients and develop an effective treatment plan to help them stay healthier and stronger for the future.
