SAFETY PERFORMANCE

The Newtron Group is a recognized industry leader, and this is due in large part to our safety program.

We believe safe employees are the key ingredient in creating an accident-free workplace.

Safety education starts with our senior management and extends to all of our field craft employees.

The intent of our safety program is to make safety a value and not just a priority.

Each of our offices provides references illustrating our commitment to safety on projects.

OFFICE LOCATIONS

With offices across the southeast and on the west coast, we can perform work across the United States.
