

We prepare individual (Form 1040), corporate (Form 1120), partnership (Form 1065) S-corporation (Form 1120S), trust and estate (Forms 1041 and 706) tax returns for our clients in a timely and professional manner.

We prepare tax returns for clients all throughout the year, not just January - April 15. We work closely with our clients during the year to inform them about their overall tax strategy and positions so they can plan accordingly and make the appropriate adjustments when needed. We find this level of interaction and communication during the year allows our clients to operate their business and personal financial lives with more certainty. The end result of preparing our clients' tax return is a clear and thorough understanding of tax compliance for the current year, and assistance for planning the upcoming year.

Our knowledge and ongoing education in this ever-changing tax environment will assist you to **Move Your Company Forward.**

We will assist our clients on organizational setup to choose the correct tax structure for their entities. Choosing the correct tax structure is an important decision and we can assist you in that process and identify the strengths and weaknesses of each structure to assist you and your legal team in making the correct decision.

We work with many businesses with traditional December 31 and fiscal year ends.

Many of our "tax only" clients call and meet with us during the year to take advantage of our understanding of their businesses and knowledge.
