

DSG Global Inc. (DSGT), Subsidiary IMC Unveil Array of New EVs at Experience Center Grand Opening Event

- **Quality, value, diversity hallmarks of EV grand opening event.**
- **IMC has existing inventory already on hand, doesn't require substantial amount of capital before seeing profitability.**
- **Company offers affordable vehicles with emphasis on great design, a green mindset, performance and functionality.**

DSG Global (OTCQB: DSGT), an emerging global technology company with an array of interconnecting businesses in some of the fastest-growing market sectors, and subsidiary Imperium Motor Company (IMC) unveiled more than two dozen electric-powered vehicles at the grand opening of the Imperium Motors Experience Center in Fairfield, California (<https://nnw.fm/qDbE4>). Held June 18–19, the grand opening event included interviews, press coverage, test drives, snacks and a chance to win an E-Rover.

“While we are confident that potential customers will be impressed with the quality and value of our vehicles, they may be surprised by the diversity of our product offering and some of the new vehicle models we will unveil in the near future,” said IMC president Rick Curtis prior to the event. “We look forward to providing an educational and rewarding experience for all visitors.”

Designed to create interest in IMC's impressive line of EVs, the event encouraged attendees to drive and ride in 25 different electric-powered units, including the company's flagship Imperium ET5 SUV, the Van Maxx, the Urbee 4, the new Jonway T3 Cargo, the Urbee Security LSV, the Raptor Golf Cart, the Rumble lineup, the Imp Chimp and other models. Unlike many companies jockeying for position in the EV space, IMC has existing models and inventory already on hand, ready to be sold. This means the company doesn't require a substantial amount of capital in order to see profitability.

“We are confident that we have one of the most diverse product lineups in the electric vehicle industry,” said Curtis (<https://nnw.fm/AlkfZ>). “There are very few other vehicles at our price point that include the standard equipment and functionality that we can offer.

IMC is an EV sales, manufacturing and marketing company that offers affordable vehicles equipped for the North American market with emphasis on great design, a green mindset, performance and functionality. Available vehicles include high-speed, mid-speed and low-speed cars, trucks, SUVs, vans, buses and scooters. Many models were available for purchase at the grand opening of the experience center, while others were available for order.

DSG Global is an emerging global technology company with an array of interconnecting businesses in some of the fastest-growing market sectors. With roots in the golf industry, in which it specializes in fleet management with patented analytics, mobile touch-screen engagement and electric golf carts under the VTS brand, the company is moving quickly with road-ready electric vehicles for sale in the first quarter of 2021 through its Imperium Motor Company subsidiary.
