

Rev	Data Management activities	Breeding/Pregnant Heifers	All Cows	Replacement Heifer CALVES	Feedlot Steers & cull Heifers	Breeding Bulls
20-Jan-2020	Add Carcass data from last years calves.			3-4 months old Vaccinations: Vaccinate BI's Caliber 7 and "Pyramid 5 + Presponse SQ"	3-4 months old Vaccinations: Vaccinate Caliber 7 and "Pyramid 5 + Presponse SQ" Implant steers with Raigro	Bulls out from heifers.
16-Feb-2020	Determine: Number of vaccines required and order.	BULLS OUT Breeding ends (82 days since AI) Use Ultrasound to id calf age. Heifers pregnant after 45 days limit sold as lower fertile females.. Began Feeding 4% P Hi Mg Minerals	BULLS OUT Breeding ends February 13 (65 days since AI) Began Feeding 4% P Hi Mg Minerals			Feed 4% P Minerals Move bulls to SF or Pops
24-Mar-2020	Record weaning data and cow pregnancy results and data	Preg check - Heifers pregnant after 45 days goal are sold as lower fertile females. Vaccinate with BI Triangle 10 (killed virus). Put with mature cows for summer	Ultrasound pregnancy check with fetus age recorded. Vaccinate with BI Triangle 10 (killed virus)	PREWEANING: Vaccinate with Pyramid 10 and Caliber 7 . Deworm with INJECTABLE Cydectin & Synanthic drench.	PREWEANING: Vaccinate with Pyramid 5 and Caliber 7 . Deworm with INJECTABLE Cydectin & Synanthic drench. Implant steers with Revalor-G Implant . .	
April 25 - WEANING	Submit ALL data to ASA		Began Feeding 4% P Minerals	Calves weaned. Heifers and steers kept together. Collect "Weaning Weight", disposition, Frame Score, hoof socre.	Calves weaned. Heifers and steers kept together. Collect "Weaning Weight", disposition, Frame Score, hoof socre GET THEM ON A FEED TO GAIN 2.5 ADG	If needed, move bulls to pastures with cattle that ARE PREGNANT
1-Jun-2020	PRIOR to June 1, Use cow history to evaluate which calves go to replacment heifers, to feedlot and to Sale Barn. Update "Calf Outcome" with heifer pregnancy results.	Weigh, BCS, hoof score, and disposition score. Plus Frame score if =<4YO. Install FLY TAGS .Spray with Co-ralor other for flies. Dewormed with Cydectin Injectable and vaccinated with BI's Pyramid 10 (MLV)	Weigh, BCS, hoof score, and disposition score. Plus Frame score if =<4YO. Install FLY TAGS .Spray with Co-ralor other for flies. Dewormed with Cydectin Injectable and vaccinated with BI's Pyramid 10 (MLV)	Spray with Co-ralor other for flies. Dewormed with Cydectin Injectable and vaccinated with BI's Pyramid 10 (MLV) Weigh. Establish supplement feed rate to achieve desired breeding weight.	Spray with Co-ral for flies. Weigh Feedlot bound calves to see how they are gaining. Estimate Shipping Date. Vaccinate 21 days prior to shipment with " Pyramid 5 + Presponse SQ "	
					Confirmed ship date. GET VET TO PREPARE HEALTH PAPERS. LINE UP TRUCK	
23-Jun-2020					Ship feedlot steers. Put on hay and water 24 hors prior to shipment. Weigh as close to shipping as possible.	
15-Jul-2020	Evaluation: Evaluation: Determine what AI sires will be used on which animal	EXAMINE: Examine for BCS. Adjust supplement as needed to obtain BCS 6	EXAMINE: Examine for BCS. Mature cows must make it without supplement. 1st & 2nd calf cows may need supplement	Prebreeding -90 days - Vaccinate w/ BI's Citadel L5 .Put in Corathon fly tages (2018) and spray with Co-ral. Weigh to make sure they will be at right weight on Oct 17. ??Vet must be present to vaccinate with RB-51(brucellosis)?? (See comment-NO PI TESTING). Combine with Pregnant heifers and young cows		

Rev	Data Management activities	Breeding/Pregnant Heifers	All Cows	Replacement Heifer CALVES	Feedlot Steers & cull Heifers	Breeding Bulls
1-Aug-2020		Separate pregnant heifers and put with young cows. Begin supplement with corn	Replace Fly tags. Examine for BCS to see if all are in acceptable BCS. Pregnant cows must make it without supplement. Sort bred heifers and cows pregnant with 2nd calf (in 2020 this is "E" & "F" tagged females) as to separate and began supplementing.	Deworm with Cydectin Injectable and drench(???) with Symantic		Remove bulls prior to calving.
1-Sep-2020	Enter calving records	Begin 4% High Mg mineral CALVING: Calving will begin Sept 2 for AI calves.	Begin 4% High Mg mineral	NEW BIRTHS Apply visual Tag and EID. Apply Iodine to navel and to tag holes in ears. Castrate male calves. Weigh calves. Record Cow Udder and teat score		
20-Sep-2020	Record: Make sure to record all necessary birthing information.		CALVING: Calving will begin Sept. 23 for AI calves and end on Nov 23.	Prebreeding: Vaccinate with Express FP 10. YEARLING DATA Weigh and BCS, hoof score, disposition score and Frame score Deworm with Cydectin pour on..		
Oct. 21,2020	Making breeding decisions and develop <u>AI/Natural Service Breeding Plan</u> . Order semen and AI supplies.			AI:insert CIDR for 14 days. Separate and begin to feed		Prebreeding: Conduct breeding soundness examine. Vaccinate with Express FP 10 (???). Deworm with Cydectin INJECTABLE
Nov. 4, 2020			Begin 8% P Hi Mg Mineral	AI: Remove CIDR 14 days after inserting. Begin 8% P Mineral		Begin 8% P Mineral EXAMINE: Examine for acceptable body condition.
20-Nov-2020				AI: Give HEIFERs GnRh		
29-Nov-2020			Cow calving ends Nov. 20			EXAMINE: Make sure bulls are staying in acceptable body condition.
6-Dec-2020			AI: Insert CIDRs & give <u>GNRH Cystorelin (Merial)</u> injection AI: Remove CIDRs cows & inject Lutalyse(Prostaglandin)			
9-Dec-2020			AI cows. Inject with <u>GNRH Cystorelin (Merial)</u> -	GO TO COLUMN "Breeding/Pregnant Heifers" for January items		
18-Dec-2020			Put bulls with cows or set up heat checks
