

Electronics Test Technician

The world of drones, autonomous vehicles and ROVs is growing and Gladiator Technologies is growing along with it. As a result, we have an immediate opening for a full time Electronics Test Technician to support our 2nd shift.

The Gladiator Technologies Division of LKD Aerospace was founded in 2005 to design and manufacture high performance MEMS-based inertial sensors and systems to high-value air, land and sea applications.

Gladiator Technologies offers a competitive salary and benefits package, a professional, collaborative, and positive team-oriented work environment in a rapidly growing organization. We value performance and commitment to quality in our workforce and encourage all high performance qualified candidates to apply.

Our Electronics Test Technician will:

- Maintain test and quality records associated with production testing and assembly per AS9100C / ISO 9001:2008
- Perform manual and automated tests on assemblies, end items and system level testing to ensure product quality and reliability in accordance with internal policies and regulatory and safety requirements
- Perform environmental and calibration tests including: environmental conditioning, temperature calibration, sensor noise, bias and scale factor, functional, vibration, shock, power supply sensitivity, axis alignment, magnetometer calibration, centrifuge, as well as visual inspection of various assemblies
- Assist engineering with test and evaluation of developmental products and support production transition from engineering into manufacturing
- Soldering and assembly support in peak overflow conditions
- Maintain adherence to production, test and quality system procedures and processes with strong commitment to quality in everything we do
- Perform other related duties as assigned

Eligibility Requirements:

- AA degree in Electronics Technology, or Mechanical Technology or equivalent
- Minimum 5 year test technician (test, manufacturing or repair), assembly or soldering experience a plus
- Aerospace and Defense electronics experience strongly preferred; inertial product experience highly desired
- Strong computer skills including proficiency with Windows Operating System, Microsoft Office Suite (Excel) and ERP/MRP computerized environment desired
- Excellent work ethic and can-do attitude
- Excellent attention to detail
- Strong written and verbal communication skills
- Must be able to work Tuesday – Saturday, 3:00pm-11:30pm, and overtime, flexibility desired

Because this position requires potential access to technology controlled under the International Traffic in Arms Regulations (ITAR) or the Export Administration Regulations (EAR), the successful candidate must be a "U.S. person" as defined in the ITAR and EAR. In order to be a U.S. person for ITAR and EAR purposes, you must: (i) be a citizen or national of the United States; or (ii) be

a lawful permanent resident (i.e., "green card holder") of the United States; or (iii) have been admitted to the United States as a refugee, or have been granted asylum, provided that you have applied for naturalization within six months of the date you first became eligible, and if not yet accepted, you are actively pursuing naturalization after two years from the date of your application.

How to Apply: Applications are accepted using our online application process. Please go to: <https://careers-hrpmsi.icims.com/jobs/3342/electronics-test-technician/login> to start the online application process. Please submit your resume and cover letter in one PDF or WORD document.
