

# PRECISION REEL MOWERS

**COMMERCIAL QUALITY • PROFESSIONAL RESULTS**

Since 1935, California Trimmer mowers have been manufactured with the commitment to produce the best power reel mower available. California Trimmer reel mowers will provide you with a healthy lawn that has the look of a finely manicured golf green. Rotary mowers tear and rip the grass removing nutrients causing brown spots, rough growth and thatch. Reel mowers make very clean, sharp cuts, like a pair of scissors. When grass is cut in a clean, smooth manner, moisture and nutrients are locked in promoting healthy growth and less maintenance.

## LONGER LASTING CUT

Our reel and cutter bar are both handcrafted of heat-treated high carbon steel, allowing for sharper blades and a longer lasting cut.

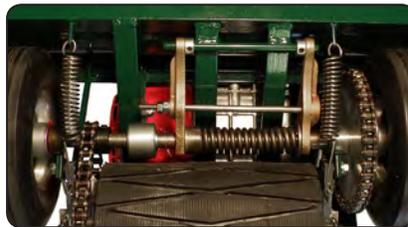

## DEEP TREAD DRIVE ROLLER

The extra-wide and grip textured surface area provides solid traction to effectively propel the mower while protecting the grass.

## HEAVY-DUTY DRIVE SYSTEMS

All shafts are supported by full-sized ball bearings and are driven by large chains and heat-treated sprockets.

With many years of proven performance, the unique clutch engagement and drive components have been designed to provide strong and reliable operation.

## EXTRA-LARGE GRASS CATCHER

A capacity of up to 4 bushels (on the RL255/257) reduces emptying stops and starts. They are made from durable high-density polyethylene and the simple and convenient mounting method provides easy access and removal.

**LIMITED WARRANTY** Reel Mower Chassis / Frame: 2-years residential / 1-year commercial  
Honda Engine: GC160: 2-years residential / 90-days commercial • GX120/160: 3-years all applications
