Menu of Tests
There are a range of testing solutions available for your school community.

**MODEL:** Diagnostic “swab-and-send”
**SAMPLE COLLECTION:** Shallow-nasal swab
**METHOD:** Lab-based PCR (polymerase chain reaction) – the gold standard in accuracy

Samples are collected when individuals have COVID-like symptoms or have been exposed to someone infected with COVID-19. Samples are shipped to vendor laboratories for testing.

---

**curative**
- Self-swab for ages 4 and up*
- Results in 48 to 72 hours
- Vendor manages reporting and notifications
- No CLIA waiver required

---

**everlywell**
- Self-swab for ages 16 and up**
- Results in 48 to 72 hours
- Vendor manages reporting and notifications
- No CLIA waiver required

---

**AtlasGenomics**
- Self-swab for ages 4 and up*
- Results 12 to 36 hours
- Vendor manages reporting and notifications
- No CLIA waiver required

---

**cic Health**
- Self-swab for ages 5 and up*
- Results in 12 to 24 hours

| Abbott | • Self-swab for ages 4 and up*  
• Results in 15 minutes  
• CLIA waiver required |
| BD     | • Self-collection for ages 4 and up,* or can outsource collection to BD’s labor partner  
• Tests conducted by medically trained staff  
• Results in 15 minutes  
• CLIA waiver required |
| AccessBio | • Self-swab for ages 4 and up*  
• Results in 15 minutes  
• CLIA waiver required |

*with trained observer (does not need to be a healthcare professional)

### POOLED TESTING

**MODEL:** Screening “swab-and-send”  
**SAMPLE COLLECTION:** Shallow-nasal swab  
**METHOD:** Lab-based PCR (polymerase chain reaction) – the gold standard in accuracy

Samples are collected from cohorts on a routine basis and sent to the lab for testing. Follow-up, targeted testing is conducted for positive cohorts or “pools.”
