

Educator Example

What Becca did:

- 1. Choose one of the tasks.**
I chose going to the beach.
- 2. Think about what you will need. What are your supplies? What steps will you need to achieve the goal?**

My sprites are anything that will move during the trip. My sprites include myself, my two nephews, 2 towels, 2 buckets, 1 large shovel, 1 small shovel, a floatie, 2 blue gatorade, a water bottle, a bag, my car, and sunscreen.

My background is what will not change - the beach.

My first codes include:

1. Place all sprites, except myself, and my 2 nephews, into the bag.
2. Place all sprites in the car.
3. Drive the car to the background (the beach).
4. Remove all sprites from the car.
5. Place all sprites on the background.
6. Remove the floatie sprite from the bag, and place on the smaller nephew.
7. Remove the sunscreen sprite from the bag and place on myself, and my 2 nephews.

What comes next? Can you finish my code? Did I forget any sprites?
