

SECONDARY METALLIC WIPER SEAL (DT-S1)

For External Floating Roofs

DirecTank's Secondary Metallic Wiper Seal (DT-S1) for aboveground storage tanks is the most versatile, effective secondary seal in the industry featuring enhanced durability and premium materials to ensure a long and reliable service life.

The DT-S1 provides a consistent, tight-fit against the tank shell that is sustained throughout periods of repeated dynamic loading and high cycle frequency. The critical components are manufactured from high-strength, hardened spring steel to combat challenging operational conditions, wide variable rim gaps, and tank shell abnormalities.

Every DT-S1 is designed by DirecTank's licensed professional engineers and subjected to DirecTank's rigorous, industry-best quality assurance program. The DirecTank DT-S1 is an enhanced secondary seal based upon sound design principles and proven technology. It provides installer-friendly features at an economical price with the best lead time and warranty in the industry.

Secondary Metallic Wiper Seal

Key Features

- Unmatched sealing performance ensures a tight fit against the tank shell with virtually no gapping
- Hardened high-tensile stainless steel support plates provide a continuous, reliable "spring-back" over a long service life for all tank shell conditions
- Easily installed while tank remains in service or out-of-service
- Support plates are lapped and independent of one another, enabling a sufficient degree of freedom for variable rim space and inherent flexibility
- Continuous vapor barrier fabric on the underside, eliminates need for unreliable gaskets on the support plates
- Premium vapor barrier fabric options, including polyurethane and Teflon®
- Custom protector clips on the underside to shield the wiper tip fasteners from contacting the tank shell
- Can be designed and equipped with burn-out ports for firefighting foam systems

DT-S1 Secondary Metallic Wiper Seal

Key Benefits

- Robust, customized components provide a continuous, worry-free operation
- Highly resilient and chemically compatible wiper tip. Designed to function in almost all conditions, maintaining a tight fit to general tank abnormalities
- Excellent support plate compression ensures a tight fit across the entire working range
- Premium, independently certified materials with full traceability
- Simple, safe installation with all-bolted connections. No gasketed connection required between the support plates
- Suitable for a broad range of service conditions, tank shell conditions, stored products, and floating roof types

About DirecTank

At DirecTank we maintain one of the largest and most diverse inventories in the industry, reinforced by a robust global supply chain management system. We pride ourselves on being truly customer-focused, with a commitment to high-quality, competitively-priced products delivered within the shortest lead time in the industry. We are the most diverse aboveground storage tank (AST) products company in the business, merging cutting-edge ideas with over 100 years of collective experience that has been acquired from all phases of the AST industry.

DirecTank is a proud member of the DSS Group of Companies, privately owned and operated in Houston, Texas, and we are committed to becoming the most trusted AST Products company in the industry.
