

MentorIBC

Axiom Research Compliance introduces a new tool to manage the increasingly complex regulatory and compliance process.

Special features of MentorIBC include:

- Client defined multi-part forms and customizable protocol submission form
- Full document management system for each protocol
- Track biosafety levels and biological material types
- Annual reporting for protocols that require it
- Support for Post Approval Monitoring (PAM), amendments, adverse events and protocol deviations
- Automatic meeting agenda creation
- Notification templates that automatically populate with protocol specific data
- Protocol messaging system for IACUC members with option to include PI
- PI training certification tracking (+ integration with CITI)

Like all Mentor components, MentorIBC is a fully hosted SaaS solution. We manage all backups, security (PCI Certified), data encryption and upgrades. MentorIBC integrates with popular client identity management systems (LDAP, CAS, Shibboleth).

We guarantee 99.95% uptime.
