ApexonHealth

Provider Analytics

Established healthcare providers are investing millions of dollars annually to cull meaningful insights from their data and drive better clinical and financial outcomes.

ApexonHealth

> Within Healthcare the cost of service is increasing pushing Providers to increase volume of patients and improve the operations of a healthcare system. Analytics is being looked at as a means to understand and target solutions for both these business problems

ApexonHealth Advantage

With over 2,000 resources serving our payer, provider and Pharmacy Benefit Management (PBM) clients globally and the fastest-growing healthcare practice – ApexonHealth is the 'partner of choice' for providers to navigate healthcare transformation and to stay ahead of today's healthcare revenue cycle management challenges, from the initial patient encounter to collection and beyond. Our predictive analytics approach amplifies the learning and required focus action.

ApexonHealth helps hospitals, clinics and physician practices improve their financial status and patient care delivery models by:

Improving health care outcomes by providing timely and meaningful insights to administer the most effective treatments	Identifying crises before they happen and treat patients pro actively by analyzing data in real time	Predicting patient health risks using predictive analytics	Making the most relevant patient information available so they can provide effective care	Enabling better revenue cycle management and financial performance management

ApexonHealth provides analytical toolkits, Data Warehouse solutions, business process accelerators and experts in health data intelligence discovery to help providers deliver high quality care and attain their financial and compliance goals. We help users to gain holistic insight through data with our analytics solutions, we leverage information to improve all stages of the data management cycle.
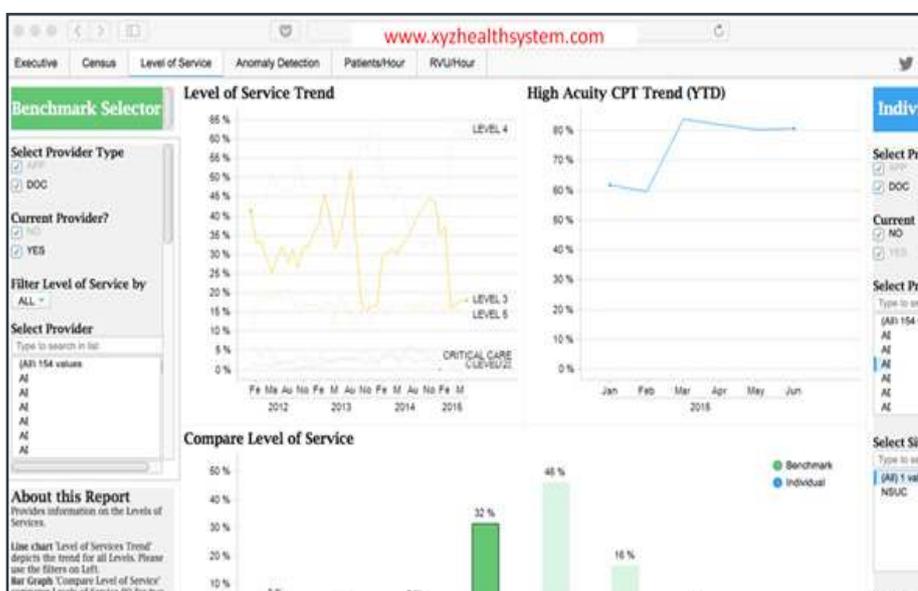

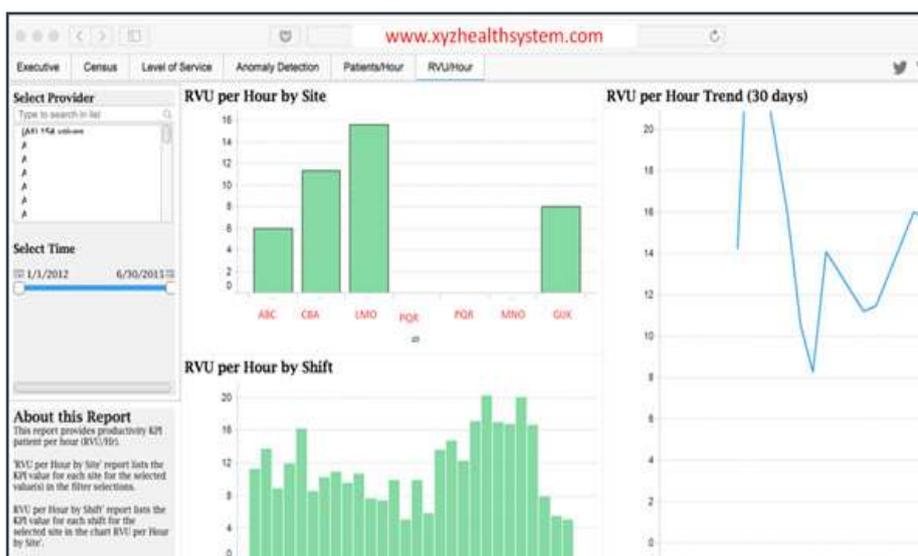

ApexonHealth's capabilities in data management and infrastructure allow us to handle data to create actionable insights. Bringing to bear the experiences across several verticals we apply the knowledge to healthcare solutions. The following table highlights a few potential areas of analytics application with healthcare.

Our solutions span across 4 broad areas of:

| Clinical	Financial	Operational	Compliance & Reporting
• Clinical KPIs • Readmission Analysis • Patient Risk Scoring • Improve Patient Outcomes • Real-time analytics for patient monitoring • Improving wellness and preventive care • Press Ganey report	• Executive Dashboards • Statistical variance analysis • Predictive reporting influencing dependents • Unified cloud-based solution • Single point of truth for data availability	• Smart Dashboards • Improving Accounts Receivable and Claim Denials • Statistical forecasting of Revenue • Assessing Medical Necessity • Structuring Coding Accuracy - Anamoly detection	• Physician Quality • Reporting System (PQRS) • Capture and track clinical performance metrics • Meaningful use reporting • RAC reporting • Simulate best service quality indicators

Representative Report

Reports Management

ApexonHealth understands an organization's requirements for dynamic reporting which would help understand the current state of business and then identify improvements.
We work with clients to create two forms of reporting:

1) Scorecards: Measurement of performance based against goals
2) Dashboards: Measurement of operational performance open to discussion and improvement

A highly powerful solution exists when dashboards are centralized into specific KPIs which algorithmetically roll into a handful of KPIs for scorecards and Executive measurement. Our familiarity with healthcare data and processes gives us an advantage in building technology agnostic solutions.

Key Benefits

Improve Financial Performance	Reduce Financial and Clinical Risk	Administer Revenue Leakage	Reduce Administrative Inefficiencies	Help in Risk prediction for Population Management
Gain improved control over Accounts Receivable	Accelerate Cash Collection	Enhance Patient and Provider Satisfaction	Reduce Re-admission risks	Improve Payer Performance

Our Clientele uses our analytical solutions to constantly improve their evidence based protocols, leading to increased staff productivity, lower overhead and favorable and sustainable health outcomes.
