

### ALUMINUM OXIDE POLISHING SLURRY

#### Typical Physical Properties

- **Appearance** ..... white slurry
- **pH** .....3.0 – 3.5
- **Particle Size(coulter)**  
D50 ..... 1.9 – 2.2µm
- **Baumé**.....N/A
- **Suspension Treated**..... Yes

#### Applications

- ✓ Highly Concentrated Aluminum Oxide Based Slurry Precision Engineered for Universal Polishing applications: Digital/Free Form & Conventional Polishing
- ✓ High concentrated formulation designed to reduce costs associated with transportation and storage. Eliminate shipping of water based polishing compound and high transport costs!
- ✓ Slurry is Designed to be Diluted (at customer's laboratory) to desired Baumé Range of 30 to 12
- ✓ Higher Concentration Leads to Overall Lower Cost of Ownership. Reducing costs by 50% or more.

- **Packaging** .....(G) 4 gal/case; 144 gal/pallet  
(P) 5 gal/pail; 24 pails/pallet

- **Cautions** .....Refer to Material Safety Data Sheet
