

ALUMINUM OXIDE POLISHING SLURRY

Typical Physical Properties

- **Appearance** white slurry
- **pH** 3.0 – 4.2
- **Particle Size(coulter)**
D50 1.2 – 2.2µm
- **Baumé**..... N/A
- **Suspension Treated**..... Yes

Applications

- ✓ Precision Engineered for Polishing a Wide Variety of Polymeric Ophthalmic Substrates
- ✓ Exceptional Surface Quality on All CR-39, High Index, and Polycarbonate Surfaces
- ✓ Aggressive Use in Polycarbonate Dedicated Systems
- ✓ Slurry is Designed to be Diluted (at Customer's Site) to Baumé of 12 – 30

Output: Coulter Multisizer

- **Packaging**(G) 4 gal/case; 144 gal/pallet
(P) 5 gal/pail; 24 pails/pallet
- **Cautions** Refer to Material Safety Data Sheet
