CERIUM OXIDE BASED GLASS POLISHING COMPOUND

Typical Physical Properties

- **Appearance** ...................... white powder
- **pH** ........................................... 5.8 – 7.5
- **Particle Size(coulter)**
  - $D_{50}$ ........................................ 1.1 – 1.8 µm
  - $D_{0}$ ................................. 15.0 µm
- **Composition:**
  - TREO................................. 80% min
  - CeO$_2$ .............................. 75 – 85 %
- **Suspension Treated....** Fine flock, soft settle

Applications

- Ophthalmic applications with speeds up to 1500 RPMs
- Precision optics applications where a high stock removal is required
- For use in single bowl and central slurry systems
- Can be used with polyurethane and pitch

Packaging .......................... 20 kg carton; 640 kg/pallet

Cautions .... Refer to Material Safety Data Sheet
