

CERIUM OXIDE BASED GLASS POLISHING COMPOUND

Typical Physical Properties

- **Appearance**orange brown powder
- **pH**7.0 – 9.0
- **Particle Size(coulter)**
 - D₅₀ 1.7 – 3.0 µm
 - D₀.....15.0 µm max
- **Composition:**
 - TREO.....98% min
- **Suspension Treated**.....yes

Applications

- ✓ Concentrated Cerium Oxide based polishing compound developed with special techniques to achieve an unusually high stock removal rate while maintaining good suspension characteristics
- ✓ Recommended for all mass production applications

Output: Coulter Multisizer

- **Packaging** 20 kg carton; 640 kg/pallet
- **Cautions** Refer to Material Safety Data Sheet
