

# The Betsie Valley Community Center

## Progress Report October 2020

- The Community Services Van ***IS ON THE ROAD*** with a goal of improving the health and wellness of all residents in Benzie and Manistee Counties!
- THANK YOU to all who donated funds, in-kind services, and encouraged us to persist with this mission (even during the disruptions of Covid 19), and shared information on what families need to improve their health and wellbeing.
- You will see this Van at schools, at community centers and other service locations throughout Manistee and Benzie Counties. One major partner in the delivery of dental, medical and behavioral health services is NMHSI (Northwest Michigan Health Services Inc.)
- Over the next few months, we will begin to reach out to other providers who have valuable services and clients who need more access to them.
- You can follow us at <https://www.facebook.com/betsievalleycommunitycenter> where you can find our most up to date information, including a video tour of the Van. Or, check out our website at <https://www.betsievalleycc.org>

- For those interested in “mobilizing” their organization’s health services, please contact us for information on renting the Van.
