

# DC Wallbox Pedestal with Cable Management and Convenience Lighting

## Description

Designed exclusively for the 24kW ABB Terra DC wallbox, the In-Charge pedestal is the best solution for fleet applications where wall mounting is not practical. Built with driver convenience in mind, this pedestal can withstand extreme temperatures, provide ample nighttime lighting and charge with either CCS or CHAdeMO connector types.

Custom branding is available upon request with a nominal set-up charge. Patent pending.

## Key Benefits and Features

- Cable management with two cable retractors lifts charging connectors off freezing or hot pavements and prevents runover damage
- Corrosion-resistant aircraft aluminum construction for all-weather operation
- Convenience lighting allows for safe operation in low-light conditions. The energy-efficient LED lights are operated by solar-powered batteries.
- ADA-compliant height makes this accessible for all employees
- Removable front panel for conduit, mounting and service access
- Optional ABB Premium Holster is available for CCS and CHAdeMO connector types

## Specifications

- Cable management maintains charging connectors for single (-C) or dual (-CJ) connectors
- Materials: Sheet metal – 5052 Aluminum; Frame – Cold rolled steel; Cables – Plastic coated stainless steel
- Dimensions: 15.6" (D) X 31.5" (W) X 96.25" (H) / 396mm X 800mm X 2445mm
- Weight: 165 lbs. / 75 kg
