

INSTRUCTIONAL MATERIAL: S5

Social Emotional Learning Activities

VIRTUAL REALITY AND REHABILITATION (0:33)

Who would've thought that merging two different fields, that of engineering and medicine, could lead to something so great and successful?

- **ACTIVITY:**

- What is your best skill?
- Now, ask a classmate what their best skill is.
- How can you combine both of your skills to create "something great?" Think big! The opportunities to create are endless. You could create a startup, a product, an organization, the list goes on!

DID SOMEONE SAY, DELIVERY DRONES? (1:13)

With drones currently delivering household items and COVID-19 tests, their future is bright. Eventually, they plan on delivering medicine and other items to those in need. There is always a chance to help others.

- What is one way you can use your skills to help those in your community?
- What other positive ways can drones be used?

THE FUTURE OF SCIENCE WITH CO-FOUNDER AND CHIEF SCIENTIFIC OFFICER OF SANDSTONE DIAGNOSTICS, INC., GREG SOMMER (2:20)

Greg emphasized the importance of trial and error, affirming that "they are invaluable experiences and to embrace them."

- What does trial and error mean?
 - **ANSWER:** Trial and error is a problem-solving method in which multiple attempts are made to reach a solution.

Greg started his company in a rental house garage in California... so did Apple, Google, and Disney. Ideas are born everywhere.

- What other places are homes to some of the most successful companies?
 - **ANSWER:** Dorm rooms, garages, basements, backyards, sheds, etc.
