

Protect Valuable Ductwork

Crating available for less-than-truckload orders.

Ductwork Defense

Fact of the matter is that less-than-truck orders are handled several times during shipping. Orders are loaded and off-loaded as they reach regional hubs and transfer points.

Spiral duct is typically shipped loose and runs the risk damage.

EHG offers a crating solution for exposed ductwork projects or situation where damage from freight is a concern. These crates are custom built from wood to suit your order.

Ask your Sales Support contact for more information. Crating is available for just \$100 per crate.
