DR. CLIFF'S MOISTURIZING HAND SANITIZER GEL

With Aloe Vera & Vitamin E *Manufactured to Order and In Stock*

What are the ingredients in Dr. Cliff's Hand Sanitizer Gel and their purpose?

All ingredients are sourced in the USA as typically used in cosmetic and medical applications.

ACTIVE INGREDIENT:	PURPOSE
Ethyl Alcohol 70%	Antimicrobial skin antiseptic effective against bacteria, fungi and viruses
INACTIVE INGREDIENTS:	PURPOSE
Distilled Water	Water that has been boiled into a vapor and condensed back into a liquid to remove impurities
Propylene Glycol	Non-irritating water and alcohol stabilizer, with very low volatility and toxicity
Glycerin	A moisturizer for topical application
Carbomer	A stabilizing suspension agent that forms a gel and resists spoilage
Triethanolamine	An organic compound that acts as an emulsifier to help all ingredients blend evenly
Aloe Vera	A gelatinous substance obtained from the aloe plant used to soften and soothe the skin, which also contains antimicrobial properties
