

The Dementia & Alzheimer's Resource Committee

Presents:

Updates in Alzheimer's Research

The Dementia & Alzheimer's Resource Committee, is proud to partner with the Michigan Alzheimer's Disease Center (MADC) in bringing education and research to our community. Join us to learn about the innovative and cutting edge research studies supported by the MADC from Associate Director, Bruno Giordani, PhD.

The Michigan Alzheimer's Disease Center is one of 30 other National Institutes of Health-funded Alzheimer's Disease Research Centers across the country. Established at Michigan Medicine and based in the Department of Neurology, the MADC aims to conduct and support research on Alzheimer's disease and related disorders; promote state-of-the-art care and wellness for individuals and families affected by memory loss; and increase dementia awareness through collaborative education and outreach efforts.

2:00 PM

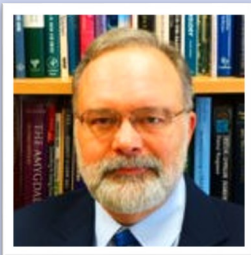

**Port Huron
Municipal
Office Center**

100 McMorran Blvd.
Port Huron, MI 48060

MICHIGAN MEDICINE
UNIVERSITY OF MICHIGAN

**MICHIGAN ALZHEIMER'S
DISEASE CENTER**

Dr. Giordani is a Chief of Psychology and a University Faculty Ombuds at the University of Michigan. Associated with the MADC for over 25 years, Dr. Giordani has a longstanding history of connecting with the community to promote a better understanding of Alzheimer's disease and related conditions. His research initiatives focus on a cross-cultural perspective on the early assessment of cognitive and behavioral changes associated with medical illness and the interaction of cognition and mobility across the life-span.
