## Cyber Security Talk Series

### “Beware of Scams” – Recognize Them Before They Get You

*by Narayan Makaram*

Scam artists are expected to steal over \$2 billion in 2020. They invariably contact you via phone calls, text messages or email, pretend to be someone you trust (e.g. IRS, your Bank, or IT support), and create a sense of urgency for you to respond. They are out to get your personal information, credit card numbers, or your money.

Come hear a few common scamming scenarios and get armed to stay a step ahead of the scam artists. Bring your stories too, to make this session interactive.

Sunday October 25, 2020
