Contracts and Designations

Position Overview

A Cybersecurity Assessments Team Lead who manages a team in support of conducting Penetration Testing and Vulnerability Assessments, and Risk Management and compliance services to systems supporting the Department of Homeland Security.

Responsibilities

The Cybersecurity Assessment Team Leader provides technical knowledge and guidance of all areas related to Penetration Testing. As Team Lead they will analyze, plan, and report on all issues to ensure projects stay on schedule and within budget. Prepares and delivers presentations as required.

The Cybersecurity Assessments Team Lead will be responsible for:

- Conducting formal network, application, wireless, social engineering, physical, and wireless penetration testing on information systems.
- Conducting network mapping to identify live hosts and active ports, protocols and services (PPS) and analyze the results of NMAP data to identify risks.
- Creating rules of engagements and developing post assessment technical reports.
- Identifying cybersecurity deficiencies in information systems by performing technical assessments of assigned systems and applications to determine the severity of weaknesses; Supports the Security Authorization (SA) and Continuous Monitoring (CM), Risk Management Framework (RMF) process.
- Developing assessment process improvements and recommendations.

Requirements

- Active Top-Secret Clearance
- Current DHS Suitability or ability to obtain one
- Bachelor's Degree in a related field such as Engineering, Information Systems, Information Technology or a technical discipline OR equivalent work experience
- 8 years of progressive demonstrated experience in Information Assurance/Information Security, with a good working knowledge of both DoD and Federal Government Information Assurance / Security policies and procedures
- Experience with information security related projects and be knowledgeable with the NIST Risk Management framework, FISMA, and DHS 4300A policies.
- Familiarity with vulnerability tools such as Nessus, WebInspect, IACS, CSAM, and AppDetective.
- Current professional cyber security certification focused on penetration testing (e.g., CEH, CMWAPT, CPT, CRTOP, GPEN, or GXPN)

2021

Position Description

Why is this a Compelling Position?

As the Cybersecurity Assessments Team Lead, you will:

- Interface with system owners and operators and the system security officers to ensure systems are protected and secure from malicious actors.
- Be a trusted member of the security team, and a key advisor to system owners and operators, supporting federal agencies to protect themselves against our nation's adversaries and sophisticated cyber threats.
- Lead a team of cybersecurity experts that helps ensure the security of information systems supporting DHS and its Components.
