## Concise Guide to the Citation Mustang

John Robert Ewing

Transportation, Books, Nonfiction

Dec 14, 2017

[View Item](#)

This guide is designed to help pilots about to undergo initial or recurrent training in the Citation Mustang to learn the aircraft systems and procedures in a fast and efficient manner divided into three main sections.

The Aircraft Systems section gathers important information from various parts of the Cessna CE510 Approved Flight and Operating Manuals into a single, convenient location and is invaluable for reviewing aircraft systems, limitations, and memory items.

The Performance section describes procedures for calculating weight and balance as well as for calculating takeoff, climb, cruise, descent, and landing performance.

The Flight Procedures section describes procedures, techniques, and profiles organized so that they follow the order of the Areas of Operation and Tasks found in the FAA Airline T Airplane and Aircraft Type Rating Practical Test Standards.
