

Solutions for the High Output Laundry

Fast & Accurate. Sea-lion spreader feeders make quick work of preparing linens to be properly positioned for the ironer or folder. Available in three and four stations, ZBQ series spreader feeders provide high efficiency and require less labor to process goods. Models are capable of spreading a variety of flatwork items up to 130 inches.

High Speed Spreader Feeder

-  Innovative clamp design is robust and need only latch onto corners to position flatwork linens on the belts. For accuracy a positioning servo motor assures a repeatable process and strong vacuum airflow for suction holds the flatwork securely against the belts maintaining the desired position for the ironer.
-  For convenient measurement of worker productivity, each station is outfitted with a simple, digital counting display to calculate items processed.

-  No need to move the machine for small items because the output table can be easily adjusted in and out automatically. Four stations model features moveable loading station to allow for feeding of small items from front of machine.
-  Multi-lingual full color touch screen control features 20 programs and can be easily networked to the ironer line.
-  Intelligent rail design option facilitates production bottlenecks by preparing and holding linens to be processed.
