

Solutions for the High Output Laundry

Field proven design. Sea-lion XGQ-F series open pocket high speed washer-extractors combine economy and performance into a reliable, field proven machine design. Features like extra-large door openings into baskets with smooth, dimpled perforations highlight the machine's design quality and build craftsmanship. Optional tilting system is available on larger models.

Commercial Washer-Extractor

- XGQ-F washer-extractors have a full spring and shock suspension system that effectively isolates vibration transmission to the floor allowing for installation where the foundation need only support the static weight of a fully loaded machine. The tubular steel frame is a solid structure housing all electrical and control components, and the suspension system that encloses all moving parts.
- Machine is finished with high grade, corrosion resistant stainless steel.

- Multi-language full color touch screen control features full programmability of all machine functions including interfacing up to 13 signals to external chemical systems, and displays relevant machine operating data, including a full array of maintenance and productivity reports.
- The drive system is an efficient direct v-belt setup fitted with an inverter with single motor. It provides smooth power at all speeds.
