

PEGASUS AIRPARK HOA

RESIDENTIAL LANDSCAPE POLICIES, PROCEDURES AND STANDARDS

Adopted September 24, 2019

Landscaping provides one of the most important features at Pegasus Airpark. The desired theme of an abundant landscape is achieved by the use of turf, shrubs, and live plant material groundcover, Xeriscape designs (lush green designs with plentiful quantities of trees, shrubs and groundcover, utilizing plant material that does not require a lot of water) are recommended.

The following is a landscape guideline to help facilitate approval of your landscape plan. Reviewing the attached checklist may also assist in your design.

DESIGN ELEMENTS

Landscape is required for all residential front yards and street side yards visible from neighboring properties, streets and common areas.

A minimum of 40% coverage of live plant material is required in graveled areas, as described above. Turf covered areas, walk-ways, driveways, sidewalks and patio type areas shall not be included in this calculation. The yards shall be landscaped with turf, shrubs and/or live groundcover. All turf areas must be contained with a minimum of a 4" wide concrete or brick edge (header). The use of turf is optional.

** A sample calculation can be found at the bottom of this document.*

Two twenty-four (24) inch box trees are to be planted eight to ten (8-10) feet behind the back of the curb in the front yard of the residence. These trees shall be one of the following varieties: Mesquite, Ever-green Elm, Ash, or an approved tree.

Desert plants (cactus, native desert trees and shrubs) will be limited to minor accent use and, in any case, must be approved by the Architectural Control Committee. Artificially colored rock or colored crushed rock is prohibited (see the attached plant list if landscape boulders are desired). Decomposed granite must be 3/8" or 1/2" in size and must be used in all areas that are not covered with turf. When mature, live groundcover or shrubs must cover at least 40% of all rock area. It is recommended that "minus" decomposed granite material be used. This type of granite will be more maintenance free, is less likely to be kicked and scattered and is more user friendly.

Trees, shrubs and annuals that enhance the aesthetic appeal of walls, planters, walks, etc., shall also be included in the landscape theme for the front and side yards. Excessive cactus or other desert "plantings" will not be approved. However, rear yards may be landscaped with desert themes, if desired, providing that the desert type plants do not grow taller than the wall height.

All irrigation systems are to be below ground, fully automated and in compliance with all applicable building codes for state and county agencies. All irrigation systems shall be designed and adjusted so as to minimize spray onto streets, driveways, walks and other non landscaped areas.

PLAN REQUIREMENTS

The owner of each lot shall submit a detailed landscape plan, which shall be subject to review and approval by the Committee and the required landscaping shall thereafter be installed in accordance with such landscaping plan. It is recommended that a landscape professional be consulted to draw the plan. Only the front yard (and front side yards, if you have a corner lot) of your property need to be shown and submitted for review.

The plan must be drawn to a scale of 1/8" = 1'-0" and displayed on a 24" X 36" sheet or digital equivalent (.pdf). Show the outline of the floor plan of the home, walkways, existing or proposed garden walls or any other "hardscape" feature to be constructed (water features, fountain benches, etc.). Show the planned fence return (this is the part of your back yard wall that ties into your home). Show the proposed location and type of each individual tree, shrub, or groundcover. All plant material must be drawn to indicate approximate mature size. Include a plant schedule specifying botanical and common names, plant container size and total number of each kind of plant. Indicate size and color of decomposed granite. Have a North arrow and scale of the drawing on the plan.

On the following pages you will find trees, shrubs, groundcovers, and vines recommended and approved by the Architectural Committee. These are all items that can be used when submitting your plans for review. This does not eliminate the need to submit your plans. This does not restrict you from proposing use of plant material not found on the recommended plant list. However, they must be approved by the Architectural Committee.

Unless an extension is approved by the Architectural Control Committee and Homeowners' Association, front yard landscaping must be completed within 180 days from the completion of your home.

Please submit your plans electronically to the Association Community Manager:

LANDSCAPE BOULDERS

All landscape boulders in the front and side yards must be granite and shall be set into the finish grade at least 1/3 the diameter of the boulder.

SIDE WALLS

A six foot (6') high block wall from the house to side lot line should be the same surface and color as the house (Reference Paragraph 3.19 of the Residential C C & R's).

MAIL BOX

Mailboxes will complement the materials, color and style of the home. The specifications for the mail-box must conform to the U.S. Postal Service and the Town of Queen Creek. The design of any mailbox shall be approved by the Architectural Control Committee prior to its construction. An owner shall apply for and acquire the necessary permit from the Town of Queen Creek prior to commencing construction of any mailbox (Reference Paragraph 3.12 of the Residential C C & R's).

LIGHT POST

Each Owner shall install at least one (1) approved ornamental light post in the front yard of the Owner's Lot. The Owner shall obtain the approval of the Architectural Control Committee of the location, design and construction of it. If approved by the Architectural Control Committee, it may be designed and constructed as a part of a mailbox structure. An Owner shall apply for and acquire the necessary permit from the Town of Queen Creek prior to commencing construction of any yard illuminating light (Reference Paragraph 3.21 of the Residential C C & R's).

NOTE:

As illustrated on this plan, all plans submitted for review and approval must meet the following criteria:

- Drawn on a 24" x 36" sheet.
- Designate North with an arrow.
- Drawn to a scale of 1/8 inch = 1 foot and label on the plan.
- Show outline of Residence.
- Show outline of all existing or proposed walkways, driveways, garden walls, and/or any other 'hardscape' features to be constructed, such as water features, fountains, benches, etc.
- Show fence returns.
- Show proposed location and type of each individual tree, shrub, or groundcover drawn to indicate approximate mature size.
- Include on the plan a plant schedule specifying botanical and common names, plant container size, and total number of each kind of plant. Indicate size and color of decomposed granite.
