

# 36X SCALE CONTROL

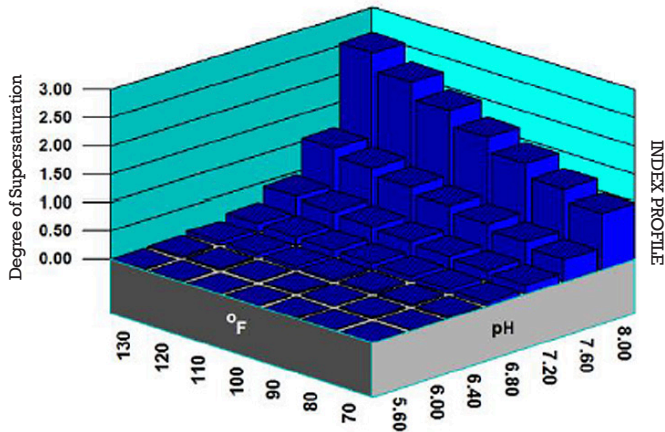

Chemstream/Enviromine has been successfully applying **36X** antiscalant to prevent discharge steam bed staining in the mining industry for several years. Chemstream **36X** is a multipurpose scale control chemistry designed to prevent staining of stream bed rocks at the discharge locations treating AMD. We will conduct a complimentary site evaluation and perform a complete lab study to optimize a treatment program for your specific needs.

## Untreated Calcite Saturation Level

## Treated Calcite Saturation Level

**Contact us today for a free site evaluation, or more information on how we can meet your specific needs.**
