# Pandemic Business Continuity Services

## Health

Ensuring the health and safety of employees, their families, customers, and communities.

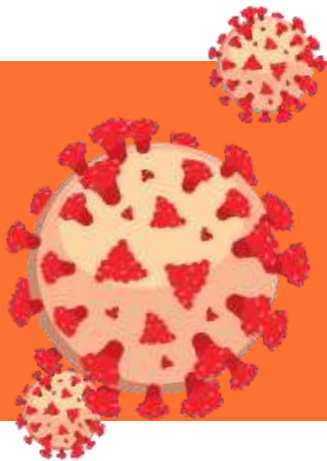

## Trust

Implement duty of care and liability obligations to instill employee and public trust in your brand, products, and services.

## Business

With a foundation of health and trust, advance your business positively.

### The Challenge

Essential services need to continue operations as COVID-19 evolves. While businesses are eager to open their doors, they must be mindful of the health and safety of their employees, clients, patrons, the community, and the vulnerable population.

### The Solution

Pandemic business continuity services give you the ability to control access and screen individuals who are visiting your physical sites or working remotely.

## Health Screening

### Employee, Visitor and Patron Screening, Testing and Access Control

#### Step 1

Obtain subject's consent

#### Step 2

Record subject's temperature & health survey responses

#### Step 3

Capture ID documents  
*(Optional)*

#### Step 4

Access denied or granted

#### Step 5

Data made available for audit trail

Technology that instills employee confidence and addresses duty of care obligations with the intake, storage, and auditing of data, while advancing trust with reassurances for the health and wellness of employees, the public and community.

## Health Screening

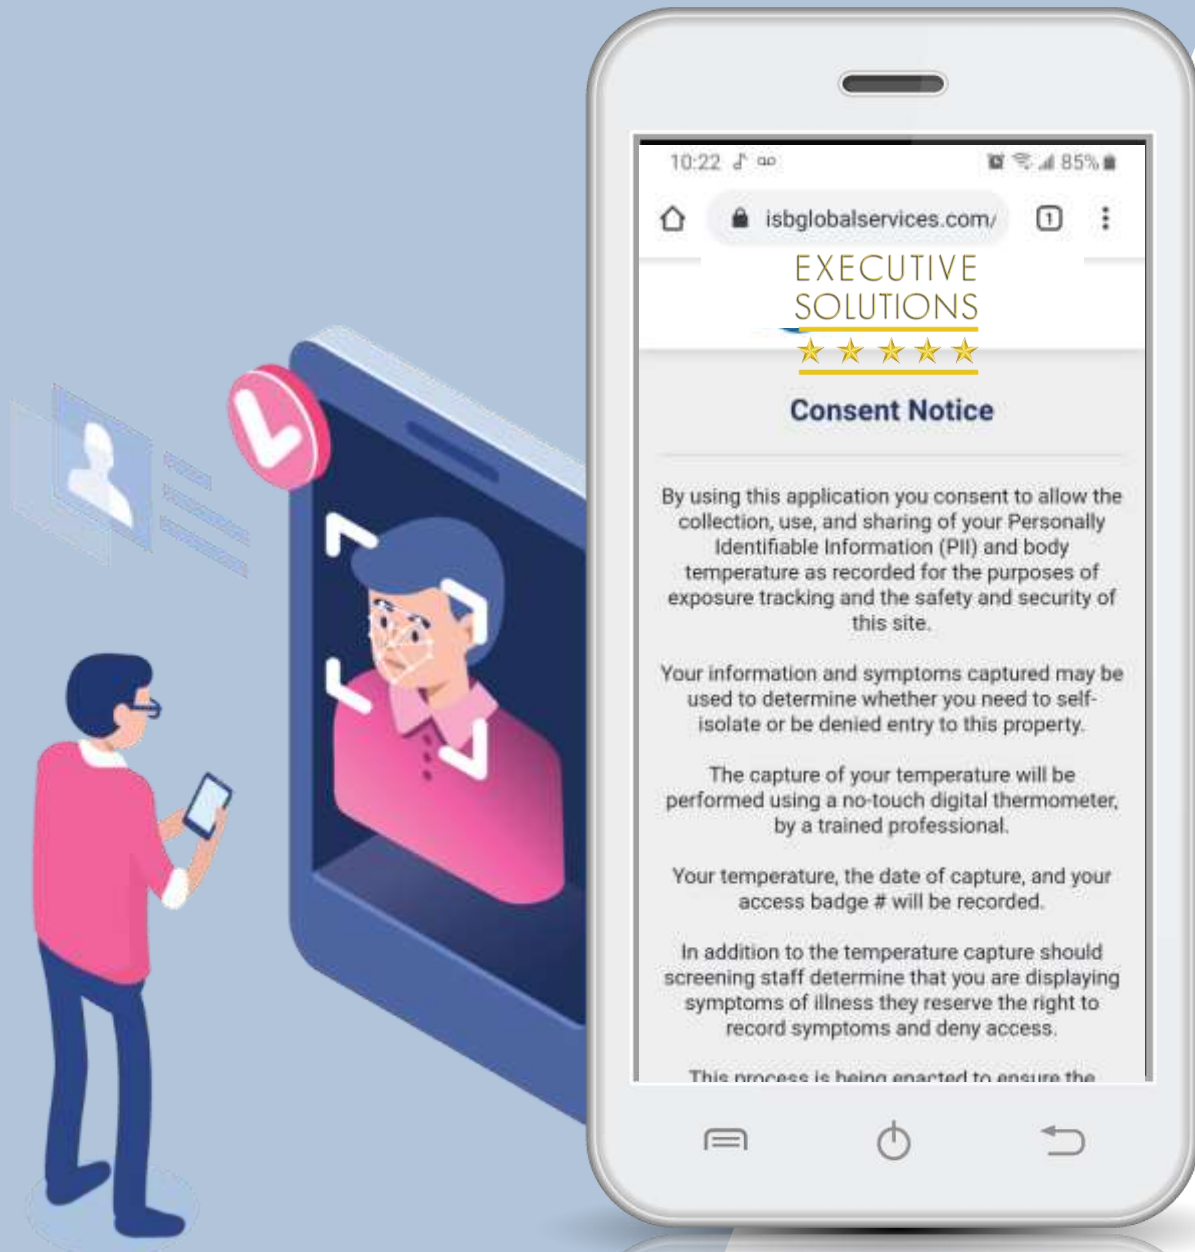

### Health Screening App

- Ideal for onsite health screening
- Captures consent
- Captures temperature and has a configurable health screening questionnaire
- Photo of ID and a picture of the subject (optional)
- Grants or denies access
- Daily audit file of all screens in a CSV or digital output
- Only requires an internet connection
- Available on any smart device (tablet/phone)
- No app download required
- Time to scan = 30-60 seconds

# Health Screening

This consent notice verbiage is entirely customizable, but it is best practice to capture consent specifically for this process as the user will be providing PII as well as images.

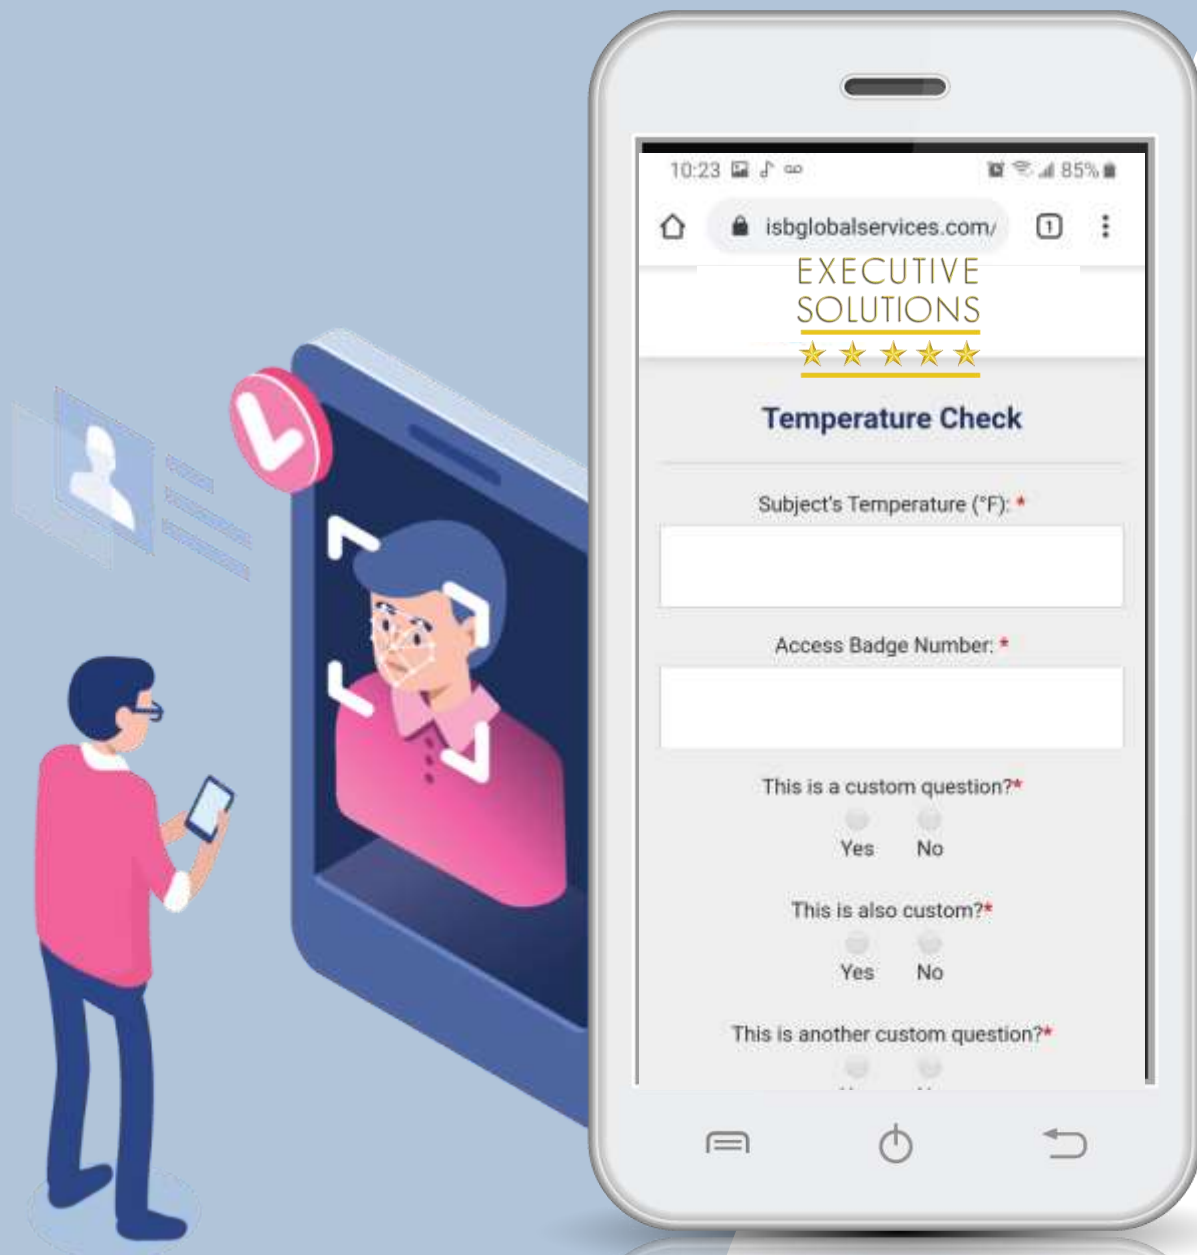

# Health Screening

This health screening questionnaire is customizable and will be configured with the requisite adjudication matrix guidelines to pass or fail a subject.

Thermal scan tools that can be used:

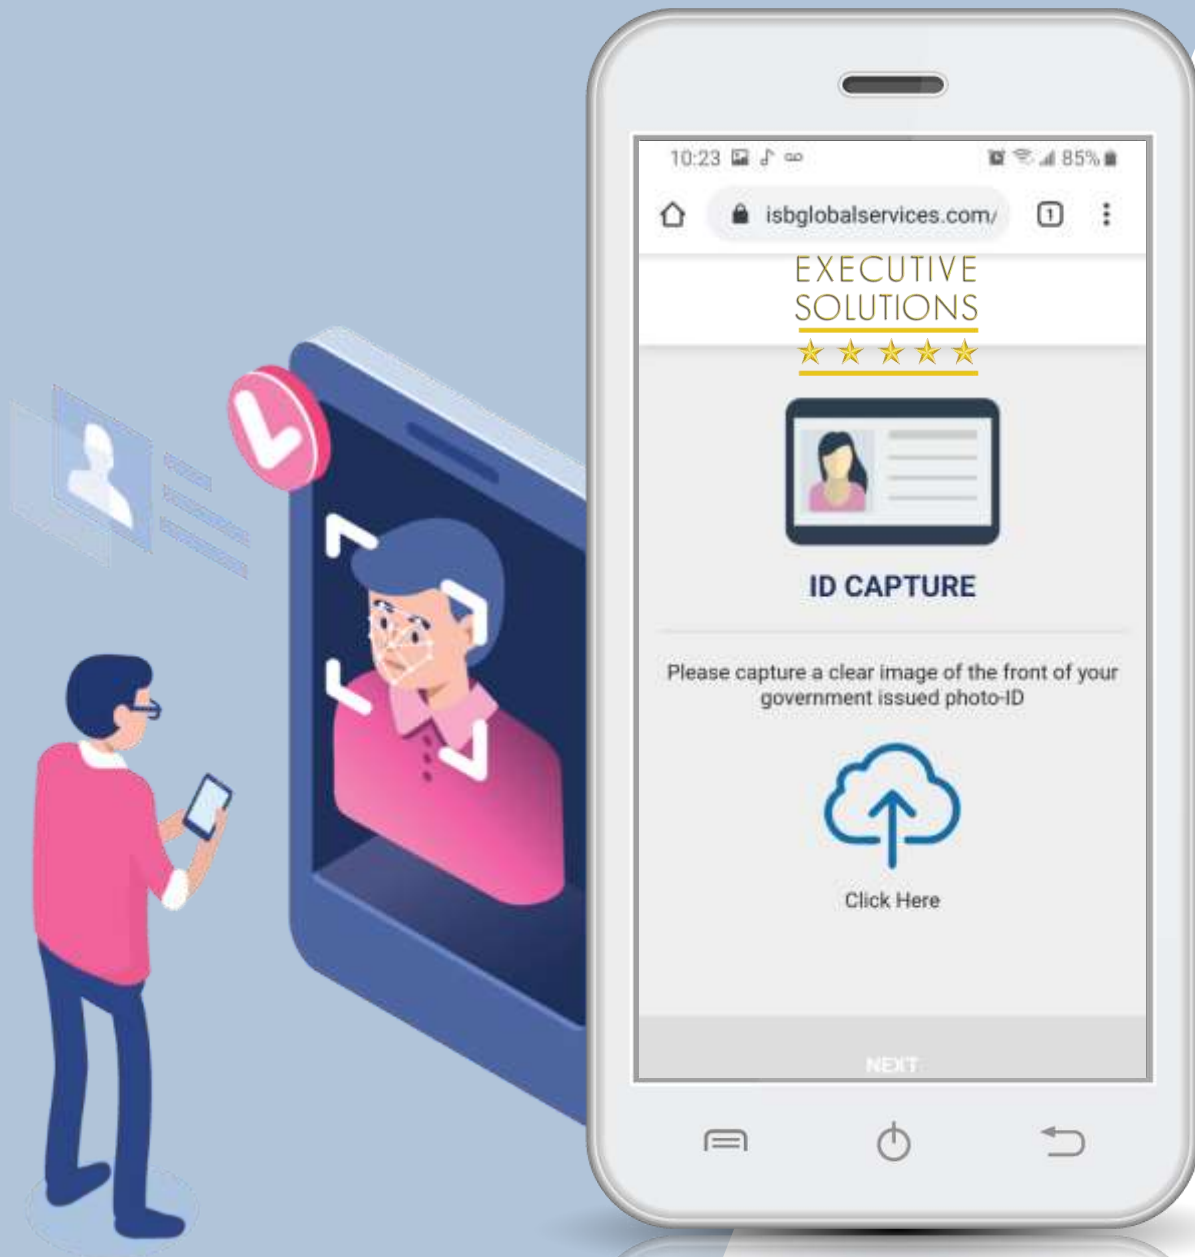

- 1) Digital no touch thermometer for individual scans (i.e., employees)
- 2) Thermal phone attachment
- 3) Thermal imaging

# Health Screening

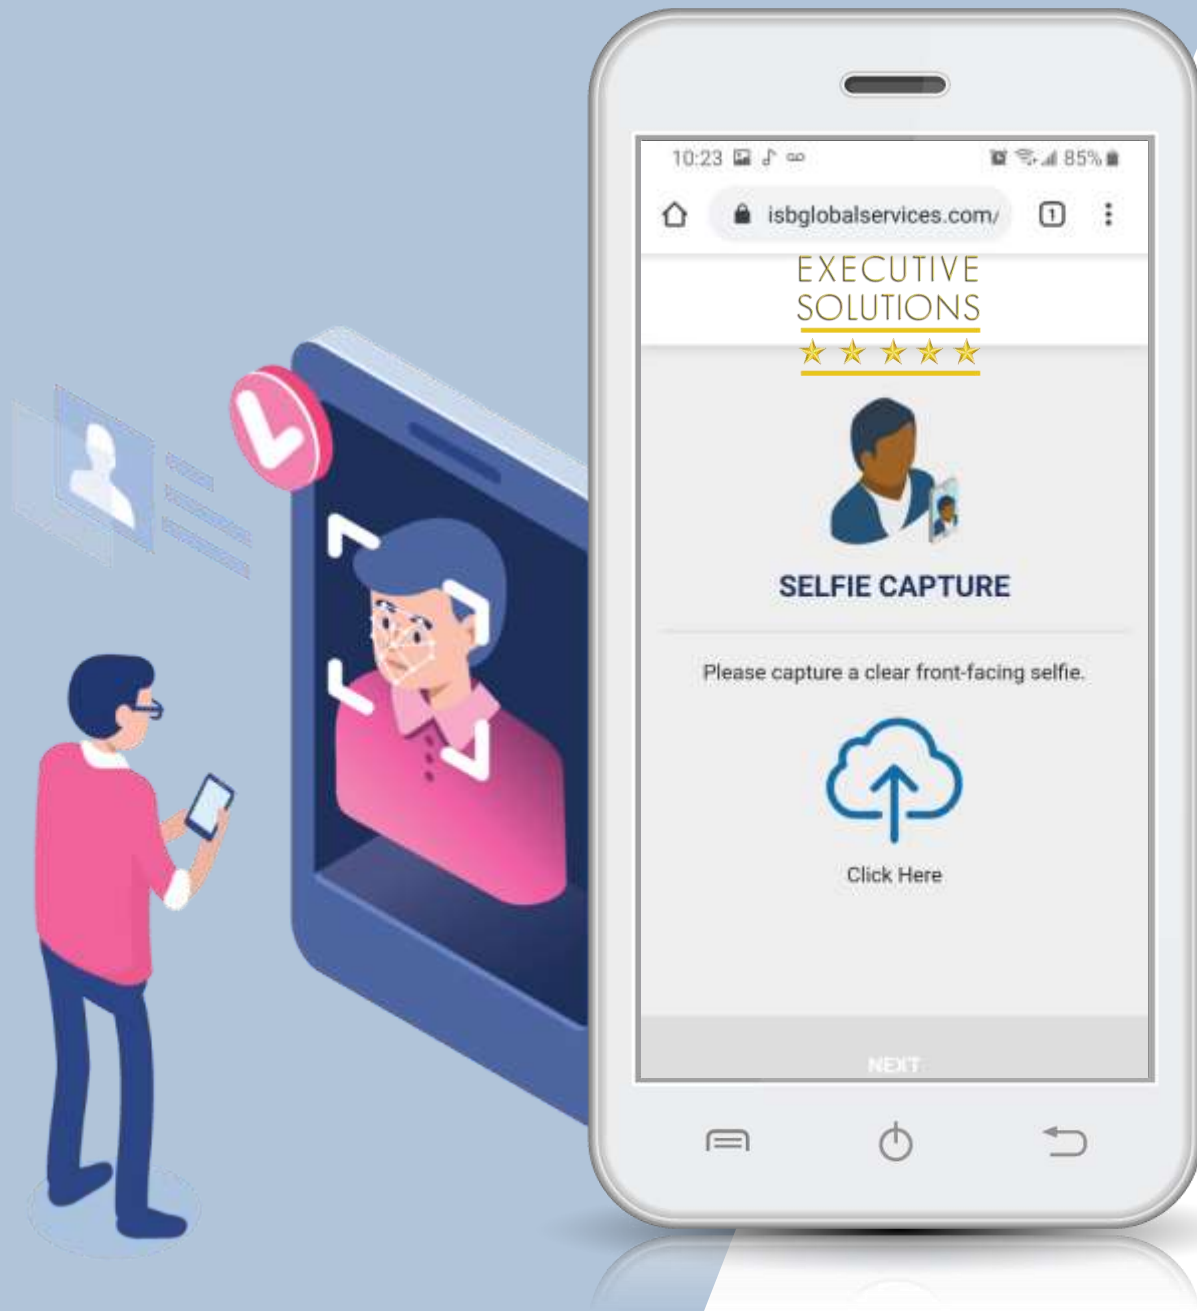

Camera captures image of Government issued or employee ID and timestamp.

# Health Screening

## Selfie Capture

- Camera Captures Image

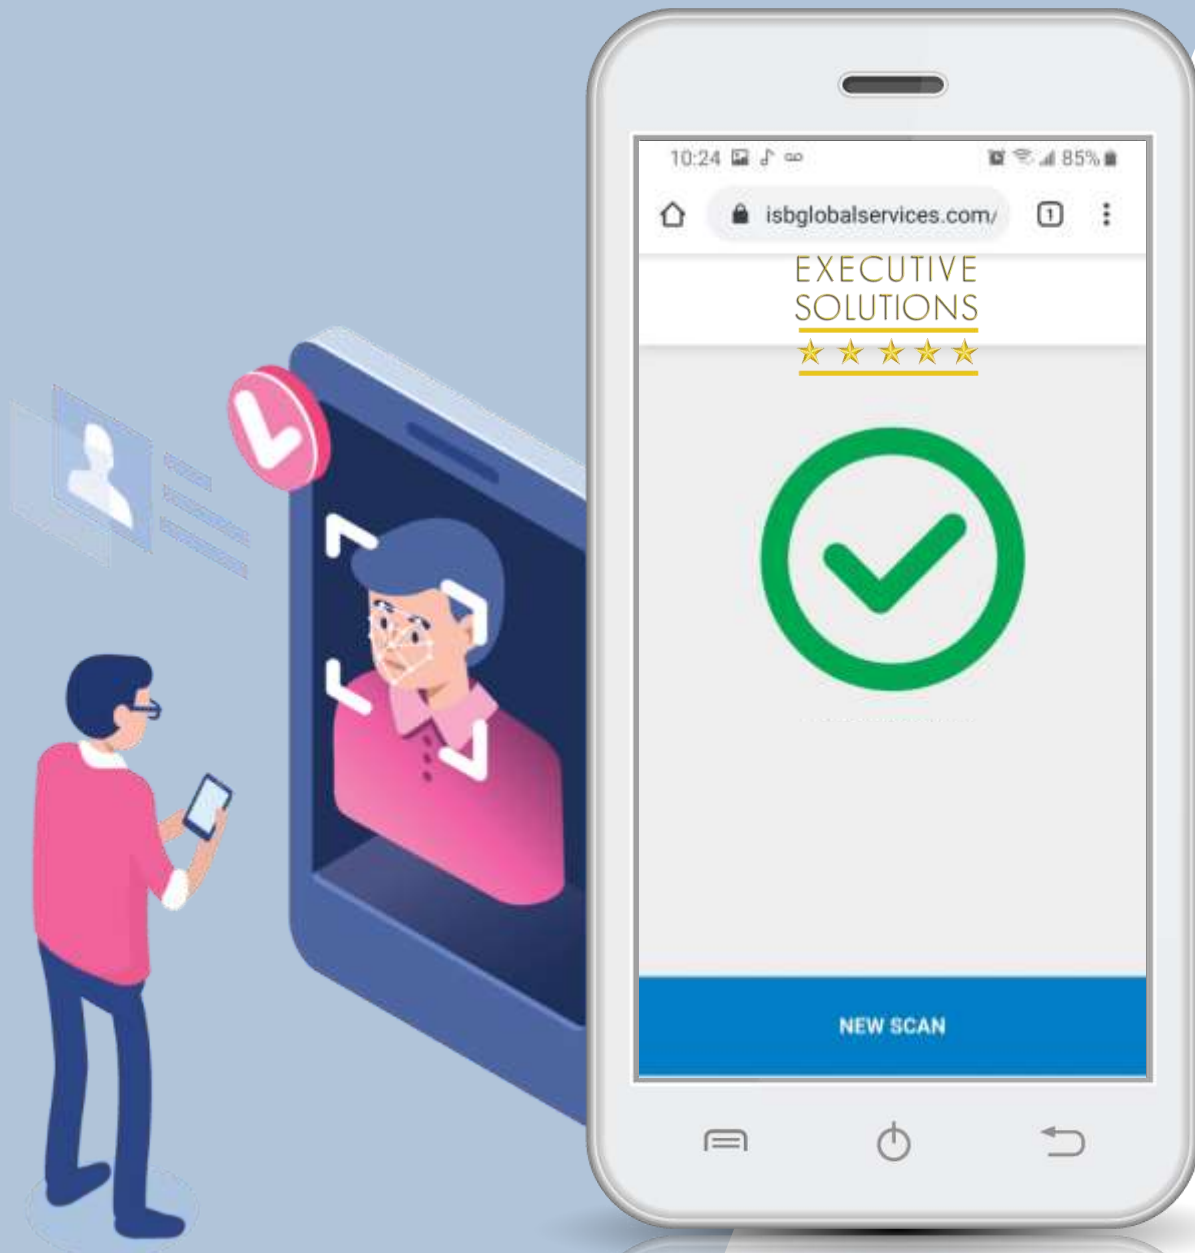

# Health Screening

Access granted or denied

- Daily audit trail is recorded of all scanned persons and available electronically in CSV or other digital file format.
