

Dear LD 18 Democrats:

A Call to Action.

The US Senate will be taking up the US House of Representative's HEROES Act in the coming days and weeks. The health crisis needs to be the top priority but we know that Congress is contemplating various stimulus ideas including bailing out the fossil fuel industry and an infrastructure package. It is a rare opportunity for Congress to not only revitalize the economy but drive down emissions, and address economic inequality and structural racism.

Make those phone calls and encourage our legislators to put People First in this coronavirus relief package and rebuild with a green economy. Include the following platform comments in your calls to Congressional representatives as they develop the next stimulus package.

Policy recommendations in summary(see attachment):

- Putting People First

- No bail outs for fossil fuel industry plus encourage the ReWIND Act

- Prioritize Voting Access

- Provide a just transition to zero emissions:

 - EECBG

 - WAP

 - Clean energy tax credits

 - National Clean energy Jobs Fund
