

## La Scala – Soft and Luxurious Alpaca Velvet

Alpaca is an exceptionally soft, luxurious fiber that was known as “the fiber of the gods” to the Incas. It is remarkably durable and different from sheep’s wool in that it is never in any way prickly. It has no lanolin – which makes it hypoallergenic for people with sensitivity to animal fibers. Alpaca is considered a luxury fiber. It is naturally glossy and has a very high tensile strength. It is resilient and extremely comfortable to sit on. La Scala, the new alpaca velvet from Place, provides durability in an incredibly soft, dense fabric that will provide years of beautiful comfort.
