1.0 INTRODUCTION

RENOVA is an 8(a) small business with core competencies as a self-performing environmental remediation, construction, and project management firm serving our clients since 2006. We employ an experienced team of project managers, environmental scientists and engineers, and heavy equipment and CDL operators. We differentiate ourselves by being equally strong at field construction as supporting our clients with project management and submittals. We welcome projects ranging from underground storage tank management to large-scale remediation implementations incorporating geotechnical construction. We have a proven track record of delivering projects safely, efficiently, and with quality workmanship. At the federal, commercial, and residential levels – we handle all your environmental construction needs, licensed, bonded and insured for peace of mind.

Mission Statement

Our mission is to safely provide cost-effective environmental contracting and project management services through process-driven systems to protect human health and the environment, and to support our clients by maximizing the overall value of their project.

2.0 PROFESSIONAL SERVICES DESCRIPTION

RENOVA offers a wide variety of cost-effective and responsive contracting services to residential, commercial, and federal clients. We are proficient at working for federal agencies, environmental consulting and engineering firms, insurance companies, environmental attorneys, general contractors, and residential homeowners.

RENOVA's experienced, in-house crews consist of OSHA-30 construction supervisors and OSHA-40 HAZWOPER-trained equipment operators, CDL drivers, and field technicians.

RENOVA is proud to consider itself an expert in offering the following services:

2.1 Environmental Remediation and Project Management Services

RENOVA offers turnkey environmental contracting and project management services. We self-perform on our work, which results in services being performed more efficiently, cost effectively, and most importantly – safely.

RENOVA provides custom solutions for the remediation of contaminated media from hazardous and non-hazardous sources. Each project presents a unique set of circumstances which RENOVA uses to implement a remediation plan that's both effective and cost-efficient. We provide services to our clients that go beyond what is stated in the scope of work; we understand their objectives and work with them to facilitate their achievement. We are also committed to staying on the cutting edge of industry techniques to get the job done right.

Services include:

- Soil Excavation
- In-Situ Soil Stabilization (ISS)
- Underground Storage Tank Management
- Geotechnical construction
- Transportation and Disposal
- Dewatering and Groundwater Pump and Treat
- Operation and Maintenance (O&M) of Remediation Systems
- Landfill Capping

2.2 Underground Storage Tank (UST) Management

RENOVA is an expert at UST location and closure. Our services and experience include working with a wide array of tank sizes, volumes, and contents, both regulated and unregulated. Our expertise includes: remote tank locating and inspections of size and contents, tank decommissioning or abandonment-in-place, and remediation of contaminated media.

2.3 Geotechnical Construction Services

RENOVA provides structural support and geotechnical construction services for federal, commercial, and residential clients. We are certified and experienced in implementing effective structural support systems for environmental and general construction applications. We work with licensed professional engineers to implement systems which offer the safest protection required.

Pile expertise includes helical piles, drilled mini piles, sheet piles, and H-Piles with the following applications:

- Foundation support for elevated homes;
- Shoring up of sinking foundations;
- Shore of excavation;
- Sliderrail and trenchbox system installation;
- Environmental walkways;
- Ground-based solar panel foundations;
- Slope stabilization and retaining walls; and
- Various other deep foundation applications.

3.0 SAFETY AND TRAINING PROGRAMS

3.1 Corporate Health and Safety Program

RENOVA's top priority is always the safety of our team members and of others who may encounter our project sites. Our entire organization embraces a culture of safety to ensure everyone's health and to ensure compliance with regulatory requirements. All team members are trained in the latest OSHA safety and construction standards and participate in periodic re-training and certification programs. Toolbox Talks are given daily with all field personnel. Independent, 3rd party safety audits, in addition to unannounced management-led safety visits, provide a fresh set of eyes and ideas to make sure RENOVA's Health and Safety Program is effective.

Certification and Training Programs include:

- OSHA 40 Hour Hazardous Waste Operations and Emergency Response (HazWoper) Training
- OSHA 30 Hour Construction Safety and Health Training
- OSHA Confined Space Entry Training
- Fall Protection
- US EPA Hazardous/Toxic Waste Management Training
- US DOT Hazardous Materials Transportation Certification
- First Aid/ CPR Certification
- Commercial Driver's License – Class A and Hazardous Materials Endorsements

Safety Program highlights:

- Daily tailgate safety meetings conducted and documented by field crews.
- Weekly unannounced safety audits of job sites by upper-level managers of Renova. These provide invaluable, real-time feedback on our ever-evolving safety program.
- Quarterly, mandatory company-wide safety training events on topics and events specific to the work we perform, conducted by seasoned safety professionals.
- Proactive upgrade from hard hats to helmets, portrayed above, which greatly exceed standard industry practice and OSHA requirements. Helmets are equipped with an integrated chin strap, full-face shield, and earmuffs.
- Proactive upgrade from standard safety glasses to spoggles, for greater eye protection.
- Proactive upgrade all work gloves to Cut Level 4 protection, which are mandatory onsite.
- To facilitate effective communication, particularly around heavy machinery, two-way radios are mandated on all job sites.

Appendix I SUMMARY INFORMATION

A. Summary Information

- Primary NAICS Code: 562910 (Remediation Services)
- DUNS #: 042451981
- CAGE Code: 688J7
- DSBS #: P1464090
- 8(a) Case #: 305549
- HUBZone #: 61115
- Bonding Capacity: 7.5M/7.5M
- EMR: .950 (through 06 DEC 2021)
- GSA Contract Holder: 47QRAA20D005N
- DBE Certified

B. Certifications and Licenses

- NJ Business Registration Certification #: 128874
- NJ Home Improvement License #: 13VH03863000
- NJ Public Works Contractor Certification #: 687204
- NJDEP UST Certification #: US331315
 - *for Closure, Subsurface Evaluation, and Tank Testing*
- NJ SBE Certification #: A0009-03
- NJ MBE Certification #: 65428-20
- NYC MBE Certification #: MWCERT2017-1054
- NY & NJ Port Authority MBE Certification
- NJDEP Solid Waste Transporter (A-901 exempt)
- City of Newark Business License: 2019-080294
- Hazardous Materials Certification #: 120319550009BC
- NJDEP A-901 License Holder

C. Insurance Information

- Commercial General Liability/Professional Liability/Contractors Pollution Liability
 - Carrier: Admiral Insurance Company
 - Coverage: \$5MM Each Occurrence / \$5MM General Aggregate
- Commercial Automobile Insurance
 - Carrier: New Jersey Manufacturers Insurance Company
 - Coverage: \$1MM Combined Single Limit (CSL) Each Accident Liability
- Workers Compensation
 - Carrier: New Jersey Manufacturers Insurance Company
 - Coverage: \$1MM Each Accident / \$1MM Policy Limit (per statutory limits)

D. Affiliations and Memberships

- Society of American Military Engineers (SAME)

- Commerce and Industry Association of New Jersey - Environmental Business Council (CIANJ EBC)
- Newark Regional Business Partnership (NRBP)
- Brownfield Coalition of the Northeast (BCONE)
- Better Business Bureau (BBB)
