

STORM MOTORS Will Pursue Sustainability Certification, Carbon Neutrality and ESG Compliance

STORM MOTORS, a subsidiary of STORM PROJECTS S/B Research Labs, and the designer/manufacturer of PowerFuel (<https://powerfuel.de>), a high efficiency combustion, low emission, fuel optimization system; with global operations in Germany, Singapore, the United States and Malaysia; has decided to pursue the Edenark Group ISO 14001 environmental sustainability certification program.

The Edenark Group ISO 14001 is the world's premier environmental sustainability certification program and allows SMEs (small to mid-sized enterprises) the ability to attain the world's most popular environmental certification standard via a program designed and priced specifically for them. Edenark Group also helps clients pursue carbon neutrality and ESG compliance, using the Edenark Group ISO 14001 as a foundation for long term compliance.

The program, which allows companies to progressively improve at a pace that works for their needs, helps the organization define how it interacts internally, externally, and with the environment. It incorporates energy/waste/water, employee health and performance enhancement, community involvement, procurement and suppliers, compliance and regulations, emergency/security, and stakeholder engagement. Benefits include creating a culture of continual improvement, stakeholder engagement, lower costs, higher revenues and profits, improved employee performance, and..... doing the right thing for the environment and current and future generations.

"We believe in protecting the planet while also allowing people to live, work and play," states Igor Groza, CEO of both STORM MOTORS and its parent, STORM PROJECTS S/B. "We produce high performance fuels and engine performance enhancement systems that reduce fuel use, cost, consumption and emission. Being ESG Compliant, Carbon Neutral and Certified Sustainable via the world's top program is consistent with who we are and how we wish to be perceived by the corporations we serve and the world community we all serve," added Groza.

"When an organization pursues, and attains, the Edenark Group ISO 14001 sustainability certification, they are not just doing it to see their costs go down and revenues and profits go up. They are setting a higher bar for their organization and sending a signal to all those around them," says David Goodman, CEO of Edenark Group. "They are agreeing to adhere to the world's Gold standard for sustainability certification; are choosing to be a leader and part of the solution, not the problem; and are joining an elite fraternity of over 300,000 organizations, in over 150 countries, that have committed to continually improving in every way."
