ADDITIVES

10ml - \$4.50

Koolada: A cooling agent that will give a cool feeling to any e-liquid without a menthol flavor. Perfect for popsicle flavors or added coolness to menthol or mint flavors.

Sour: Brings punch to any flavor and can make fruit flavors taste brighter.

Additives are not meant to vape directly on their own.

SWEETNERS

30ml - \$6.50

Sweetener: This is the fundamental sweetener that will bring a nice, sweet taste to most of your flavor combinations. Some will need the enhancement of Ethyl Maltol. Remember, the more sweetener you use the harder any e-Liquid is on coils.

Ethyl Maltol: It's a sweetener, having notes of caramelized sugar or cotton candy. It's nice for enhancing certain flavors, especially fruit flavors and tobacco. Enhances richness and creaminess. Safe to use but use sparingly as too much can mask other flavors in your recipe.
