Framed Doors & Drawers

With the day-to-day abuse cabinet doors receive in the work place, it is not surprising to find so many mis-aligned doors and faulty hinges.

At Steel Solutions USA, our casework is top notch from the ground up – including the doors. We start with high-grade aluminum extrusions for strength, precision ground corners for an accurate fit, and semi-rigid retainers to ensure close tolerances between the frame and panel inserts.

All of this ensures a door that will last for years in your demanding environment.

Noteworthy:

- Rigid, aluminum door frame
- Semi-rigid retainers to dampen sound and ensure close fit between frame and panel inserts
- Multiple panel inserts and finish options available

- **Door and drawer frames are available in:**
Aluminum with brushed stainless steel finish

- **Panel inserts are available in:**
acrylic: clear | satin | black | satin silver
aluminum: with brushed stainless steel finish
