

Underpad Usage Tips

Be informed about your product:

- Are your pads **DISPOSABLE** or **RE-USABLE**?
- **ONLY RE-USABLE** pads should go into the laundry for processing.
- If a disposable pad finds its way into the soiled linen, it will break apart due to the high temperatures of the washing and drying process.

This creates not only quality problems for other linen being processed, but also the mechanics of our equipment, which can shut down operation and delay deliveries.
