

TKO Racing Size Guide

Mota has a unique type of fit we call the 'Barefoot Fit'. It refers to the fact that our boots allow the toes to rest natural & comfortable as you skate.

Measuring Your Feet

1. Place a piece of paper on a hard floor against the wall.
2. Put your foot on top of the paper with your heel against the wall.
3. Mark your longest toe, keeping the marker/pen straight (up/down) no tilt.
4. Then measure from the edge of paper to the line. (millimeters if possible)
5. Use size guide below

*Because the foot is three-dimensional, measuring devices can only approximate your true boot size. Please keep in mind all manufacturers use different lasts to construct their boots, and sizing may vary accordingly.

Be sure you are standing with slightly bent knees, wearing the socks, stockings you will wear with your new boots. No socks if you skate barefoot.

Still unsure about the size? No worries, we offer 30 days to return your product, free of charge. Read more about our return policy [here](#).
