

TECHNOLOGY | LOGISTICS | COMMUNITY

The nation's largest independent provider of medical equipment disposition services. Since 2014, reLink Medical has assisted **over 3,000 hospitals and healthcare facilities** with the disposition of obsolete, excess, out-of-service, or used medical equipment. With global headquarters in Cleveland, Ohio and an additional logistics center of excellence in Atlanta, GA, reLink Medical is the **largest and most comprehensive solution in the industry.**

COMPANY PROFILE

EXPERTISE

With over 100 years of combined medical equipment management and eCommerce experience, reLink Medical provides a safe, sustainable medical equipment disposition solution that maximizes the return on capital equipment investments.

BENEFITS

reLink Medical specializes in planning, executing, and managing the disposition of retired medical equipment throughout the healthcare industry. An ISO 9001:2015 certified company operating with the highest quality and sustainability standards, our tech-enabled solutions support hospitals by leveraging proven processes and the power of people and infrastructure.

Our healthcare partners report 2x visibility in decommissioned equipment as well as a 10% increase in operational efficiency. At the razor-thin margins most hospitals operate with, every \$100,000 generated from used equipment is the equivalent of finding \$3M in new billings.

PERFORMANCE

reLink Medical helped IU Health gain a dedicated disposition space for properly sorting their new and out-of-service equipment while generating considerable revenue from the sale of their used medical devices.

"We know that we had a problem when we had equipment taking up clinical space and interfered with our employee's workflow. reLink was able to establish a process and program to increase the volume of equipment being removed and sold from our facility."

"The transparency reLink provides through their 360 platform allows us to see the growth of our program through the proper analytics and insights. This drives data-driven decision making on the proper allocation of funds the programs drives back to our department."
