WHAT WE DO

WHO WE SERVE

OUR CERTIFICATIONS

Defense Health Agency (DHA)

Fort Belvoir Community Hospital (FBCH) Medical Communications Infrastructure Technical Support Services (MCITS) & Cybersecurity Support Services:

Provide clinical information systems training (outpatient and inpatient), help desk support services (Tiers 1 & 2), systems administration, cybersecurity analysis and remediation, and network engineering.

Medical Device Integration:

Establish and operate a Program Management Office (PMO) to determine life cycle management and re placement requirements for medical devices to be integrated into MHS GENESIS.

Blood Transfusion Support Services & HCLL License Renewal Support:

Implement, train, and resolve defects for the DoD's Enterprise Blood Management System resulting in safer, more reliable blood donor management.

Joint Medical Asset Repository Development and Sustainment (JMAR):

Provide program management support & web development for JMAR, a web-enabled repository within the Defense Medical Logistics – Enterprise Solution (DML-ES) This repository captures inventory and transactions from distributed medical logistics systems at over 400 locations and provides flexible supply chain management.

Program and Project Management Support Services for the transitional Intermediate Management Organization (iMO):

Provide a subject matter experts in program management, IT, systems engineering, cybersecurity assessment, network engineering and site implementation/migration to support deployment of the Med-COI/ D2D network for six medical treatment facilities, and two medical centers.

Defense Medical Information Exchange (DMIX):

Integrate data from disparate systems by upholding adapters for intra/interagency health data sharing for DMIX.

Clinical Information System Trainers:

Provide training, clinical workflow and technical support to increase productivity and care communication for the Air Force and Navy clinical communities.

DHA Special Operations Command (SOCOM) Purposed Emergency Access Response Point of Injury and Trauma Simulation (SPEARPOINTS):

Develop, integrate, test and maintain a medical simulation prototype for Special Operations Forces (SOF) teams to train

collectively on SOF Medical Critical Tasks, in a mission scenario that replicates in-theater safe house/team house environments with the ultimate intent on informing the production and fielding of an enduring capability.

IPO Clinical Data Gap: Develop and implement a natural language processing and machine learning prototype to structure data for clinical decision support, analysis and reporting.

DTC - DTE SME Support and Testing Infrastructure Management Services (TIMS):

Support PEO DHMS Testing to deploy and manage data center infrastructure to test legacy and future health IT for improved: readiness, quality of care, cost of care and population health.

Joint Operational Medicine Information System (JOMIS):

Integrate components to provide complete clinical care documentation, medical supply and equipment tracking, patient movement visibility and health surveillance in theater.

DHA Defense Health Board (DHB):

Support, Analysis and Assessment: Provides studies and analysis, program management, logistics, and records and information management support for the DHB.

Department of Veterans Affairs

Electronic Health Record Modernization (EHRM) Program:

Provide deployment, testing, and transition support for the Cerner Electronic Medical Record solution.

Community Care Reimbursement System Development (CCRS):

Provide project management support, requirements analysis, design, development, COTS integration and testing support.

Enterprise Testing Service Support Services (ETSSS):

Provide testing and evaluation services and database administration support for a suite of VA health information systems to ensure the software meets VA objectives.

Product Support-Health Tier 3 Sustainment Support:

Provide requirements analysis, technical support, system engineering, cybersecurity, help desk support and subject matter expertise to sustain and maintain HPS Admin applications.

Department of State

Protected Health Information Management System:

As the EHR Solutions Provider for DOS, we are deploying and implementing the DOS MED enterprise EHR at over 200 health units worldwide. We provide enterprise application integration, data management and

governance, project management, application training, IT security compliance, and network support. We also provide the Bureau of Medical Services with infrastructure support, cloud hosting & integration, operations & maintenance, system configuration control, help desk/user support, system administration, database administration, software/web development, secure messaging, and system security administration support. We are also receiving & digitizing paper medical records from DOS locations around the globe and archiving & storing them in a NARA-compliant facility.

United States Coast Guard

Telehealth: As the Telehealth provider for USCG, provide a cloud hosted, commercial-off-the-shelf, software service solution, and live teleconferencing between Coast Guard Health Care professionals and their patients.

Health and Human Services

Grants.gov IT Services: We provide full-lifecycle IT services for the Grants.gov system which includes modernization, operations & maintenance, system security, platform management, and Tier 3 support services.

Indian Health Services (IHS)

IHS COVID-19 Enterprise Business Intelligence & Analytics Enhancement:

Provide sustainment and enhancement of Enterprise Data Management and Business Intelligence framework. Deliver strategy for maturing the enterprise data management, reporting & business analytics, and business intelligence solutions using enterprise analytics tools. Support and implement enhancements that reduce data gaps, streamline & extend data collection, and provide health information for multiple clinical and epidemiological requests.

Department of Energy

Facilities Information Management System (FIMS) and Condition Assessment Information System (CAIS):

Provide software development & maintenance, implementation, infrastructure, help desk support, and data analysis. Develop construction cost asset modeling, user training, cyber security processes and system documentation.

U.S. Army

Army Medical Simulation Training Centers (MSTC) Post Deployment Software Support (PDSS):

Provide medical simulation training (clinical & field-combat settings) software development, & integration support

to Army MSTC deployed sites. Support site configurations with help desk services, solutions development, system security management, training, and technology enhancement.

U.S. Army Medical Simulation Training Center (MSTC) Fort Hood:

Supports the establishment of the MSTC training capability at Fort Hood, TX to recertify at least 2500 Army Medics (68W) a year.

U.S. Army Medical Training Command and Control (MT-C2) System Installation:

Supports procurement, integration, delivery, installation, and testing of the MT-C2 system. at eighteen (18) fielding locations at various military installations. Supports the delivery of a medical skills training platform for military personnel to obtain sustainment and validation of their medical skills.

Securities and Exchange Commission

Freedom of Information Act (FOIA) Support:

Assist in providing full scope FOIA case management in processing FOIA/PA requests, including performing release reviews pursuant to the nine FOIA exemptions.

Health Resources & Services Administration

Office of Pharmacy Affairs 340B Drug Pricing Program Information System (OPAIS):

340B enables healthcare providers to buy drugs at steep discounts to assist low income patients. Through OPAIS, HRSA 340B manages program eligibility and participation of organizations, collects proprietary drug pricing data, and publishes discount prices.

Electronic Health Record (EHR) System Initiative for National Hansen's Disease Program (NHDP):

Provide a full-service EHR System for the documentation of treatment for patients across the U.S. who are diagnosed with Hansen's disease.

Enterprise Infrastructure and Architecture Services (EIAS) BPA:

Support a broad range of services including IT Strategic and Policy Planning, Enterprise Architecture, Capital Planning and Investment Control, IT Security, Application Development, IT Help Desk Services, Network, Hosting and other IT Infrastructure services.

Transportation Security Administration

Flexible Agile Scalable Teams (FAST):

MicroHealth provides 360 Agile services for 60 applications across the enterprise supporting design, development, testing, and adaptive maintenance activities.
