

# RITE NOW @ ROP

---

During Spring Break at Meadowlark Academy, our Student Athletes had the opportunity to engage in a multitude of fun activities! This included dying Easter eggs, an Easter egg hunt, horseback riding, science experiments including growing crystals, assembling and shooting off rockets, painting, hiking, and Geocaching! The students expressed that the best part about the Spring Break activities was getting the opportunity to try so many things they've never done before. One of our goals at MLA is to expand our students' horizons and introduce them to new, pro-social activities and hobbies that they can participate in once they return to their community. Staying true to Rite of Passage's Mission Statement, this is just one example of how we are Improving the Lives of Youth!
