Revolutionary
Power BI Data
Dashboards

*Actionable Oil & Gas data
you can read like a book to
outsmart your competition*

✓ U.S. Oil & Gas Well Production

There is finally an alternative in the well data market that gets you actionable data in a superior interface at 1/10th of the cost!

✓ U.S. Natural Gas Supply/Demand/Price

Now you can analyze the U.S. natural gas market easier and better than ever before!

Are you irritated with your reliance on market commentators to keep you informed?

✓ Now you can check the facts and ask the data follow-up questions the articles don't cover!

Would you look at data more often if someone delivered it to you on a silver platter at minimal cost?

✓ Now you can generate your own insights and smarter research topics affecting your business!

Blackbird BI, LLC

- Quickly wring insights out of the data by interacting with stunning visuals from any device with an internet connection
- No download, install, or instruction book needed for these intuitive data dashboards in the Cloud at app.powerbi.com
- Lightning fast Power BI interface so you can zoom out to see trends, and immediately zoom in to see the drivers of those trends
- Power BI calculates measures on the fly, so you immediately see decline rates, IP rates and more for any County, Operator, WellType or other filters you set
- Interactive maps on each page display the top 400 wells for immediate geographic context

Blackbird BI's crystal-clear data modeling and Microsoft's powerful new technology combine to give you the unprecedented ability to read actionable Oil & Gas data like a book to outsmart your competition.
