General

More than likely the buyers will come to the inspection. Have the house clean. Don't leave dishes in the sink, pans in the oven or cars in the garage. Change all air filters prior to the inspection. Consider having something (water) for buyers to drink. Leave your phone number for inspector in case they have any questions about the operation of your home.

- Access is clear to electrical panel, crawl space, attic space, and garage walls.
- Make sure that all utilities are turned on.
- Remove or put pets in a secure area.

Exterior

- Make sure water drains away from the house by adding downspouts and slash blocks under gutters.
- Fix any loose shingles or nail pops on the roof.
- Clean gutters and downspouts to prevent overflowing.
- Check wood trim joints for softness and caulk.
- Check all steps for looseness and secure as needed.
- If there is a deck, check for weathering wood.
- Check for any fallen insulation or wood debris lying on the ground under a deck or in a crawlspace. This creates a conducive environment for termites.
- Check hose faucets to ensure they're not loose or leaking.

Interior

- Check all windows for opening, closing and locking.
- Check all windows to ensure that they stay up on their own.
- Check all outlet covers for loose, damaged, or missing covers.
- Check all doors for rubbing/sticking when opening and closing. Repair as needed.
- Check walls and doors for holes from door handle of door stop.
- Check ceiling fans for wobbling.
- Check and replace all burned out light bulbs.
- Consider getting carpet cleaned and stretched if needed.
- Check for and fix any holes/nail pops in walls/ceilings.

Kitchens / Bathrooms

- Fill all sink basins, drain, check for leaks.
- Check disposal and dishwasher.
- Check cabinets for rubbing and ensure they are secure and open/close properly.
- Check that all burners and elements work on the stove and oven.
- Check the counter and back splash for any needed caulking.
- Check for loose, cracked tiles and missing grout.
- Check toilet for cracks, or loose/rocking toilets and tanks.
- Check supply lines and that toilet flushes properly.
- Check faucets to ensure proper hot and cold plumbing installation.
- Check laundry connection for leaks.
- Check all faucets for water pressure.
- Check water heater for leaks and corrosion.
- Check breakers for tripped or missing breakers.
- Check GFCI's and make sure they work properly.

Garage

- Check automatic revers on garage doors.
- Check garage foundation walls for termite tubes.
- Move stored items away from garage walls so inspector can view the foundation.
- Check for damaged sheetrock adjoining living space to ensure proper fire rating.
