

## Questions to ask your healthcare team about your diagnosis

Some of these questions may not apply to you or your cancer, but we hope the following list will help you get all the information you need. You may choose to select a few priority questions to ask your doctor or review your list of questions with your oncology nurse or navigator.

1. What is my specific diagnosis?
2. Where is the cancer located? Has it spread?
3. What is the size and stage of my cancer? What are the different types of stages?
4. Are more tests needed at this time to fully diagnose my cancer or determine treatment options?
5. What treatment options do you recommend?
6. What are the goals for treatment?
7. Who will be on my care team?
8. What is the best way to reach you for non-urgent questions or concerns?
9. Where can I find more information on my diagnosis and treatment? Where can I find local support resources?
10. Is participation in a clinical trial an option for me? (see Clinical Trials on page 17)

See **Questions to ask your healthcare team** about cancer treatments on page 21.
