

Airmail2[®]

Digital Mailroom

Scan stacks of daily mail with stamps

Digital delivery of daily mail engineered for law firms.

Create a digital mailroom with a productive, secure and reliable workflow engineered for law firms. Airmail2 is digital delivery software powered by Postmark for scanning mail and other paper records directly into a document management system or via email.

Mail is an everyday essential and much of it contains confidential client information. Attorneys need their daily mail and matter-related paper records while working in home offices or any place they choose.

Powering Paper2Digital Law Firms

Postmark Stamp
dispenser

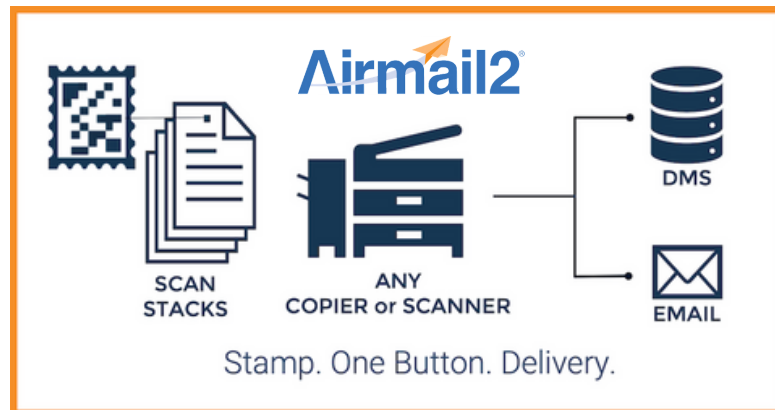

The simplicity of a stamp

Placing a barcoded Postmark stamp on the first page of a document instructs Airmail2 to deliver the document into a designated destination folder in the DMS. Scan stacks of stamped documents all at once with automated quality controls.

Fast and proven

Keep attorneys productive with reliable digital delivery. Airmail2 runs on DocSolid's proven Paper2Digital platform so it's powered by Postmark!

The reliable
paper
intake
process law
firms can
run in the
cloud or
on premise
