## Incident Investigation

Information you need to know for incident learning to prevent reoccurrence.

### Workshop Overview

This workshop provides information on incident and near miss response, notification, investigation, documentation, and follow-up to determine causes/root causes and prevent reoccurrences.

### What You Will Learn?

- ✓ Legislated responsibilities
- ✓ Incident site priorities
- ✓ Steps taken to collect/preserve evidence
- ✓ Technique to determine root causes
- ✓ How to develop recommendations

### Who Should Attend?

Managers, Frontline Supervisors, Investigation Team Leaders, Health and Safety Practitioners

### Workshop

This workshop is one-day and registration is limited to ensure an optimal learning environment. Each participant receives a handout including copies of presentation slides, supplementary reference resources, and a DNV Systematic Cause Analysis Technique (SCAT<sup>®</sup>) chart as a problem solving tool to identify the causes of incident loss.

Upon conclusion of the workshop and written test, a Certificate of Completion will be issued.

### Facilitator-John Wettstein, CRSP, CHSC

John, a Canadian Registered Safety Professional (CRSP), Certified Health and Safety Consultant (CHSC), workplace trainer, author and owner of WETTSTEIN SAFETY STRATEGIES INC., has developed and delivered customized training programs for the electrical industry, the oil and gas industry, mining, and construction industries.

With fifteen years experience as a tradesman and over thirty years as a health and safety professional, John's fun, active training workshops are reinforced with humour and enthusiasm, inspiring employees to manage Risk (Safety) through conversations.
