

Details of " Natural Heritage Priority Sites "

| Attribute | Value |
|---------------------------------|---|
| Site Code | S.USNJHP1*383 |
| Site Name | Mountain Lake Bog |
| Version | 2007_03 |
| County | Warren |
| Quad Name | Washington ; Belvidere |
| Municipality | White Twp ; Liberty Twp |
| Description | A large mostly forested and shrub dominated swamp with a shrub dominated limestone wetland, a tamarack forest, and a red maple dominated swamp forest. |
| Boundary Justification | Bounds drawn to include open shrub-dominated wetlands and tamarack forest and contiguous wetlands. |
| Biodiversity Rank | B4V2 |
| Site Class | Standard Site |
| Biodiversity Rank Justification | The site contains a globally rare wetland ecological community, as well as occurrences of two plant species that are critically imperiled in the state. |
