

Pre-K - 5th grade
**BUILDING
TIGER NATION**

Why

Repair costs exceed the costs of new buildings over time due to age

- LECC - 56 years old
- LPS - 62 years old
- LES - 78 years old

Current sites are not large enough for proper traffic flow, parking or future development

Existing facilities do not address current and future safety, health & wellness needs

Reduce reliance on trailers and mobile carts

Existing classrooms do not provide up-to-date technology, programs, and labs to prepare students for future success

How

Design new buildings to appropriately support preschool through grade 5 on new available property

Campus designed to optimize:

- Building and campus safety throughout
- Spaces that support the critical needs in mental health and counseling
- Parking and traffic
- Operations and maintenance

Campus designed to provide:

- Potential for community partnerships
- Increased access to programs and services
- Outdoor learning opportunities
